

FABLE Pakistan

All-Scenarios Graph Report

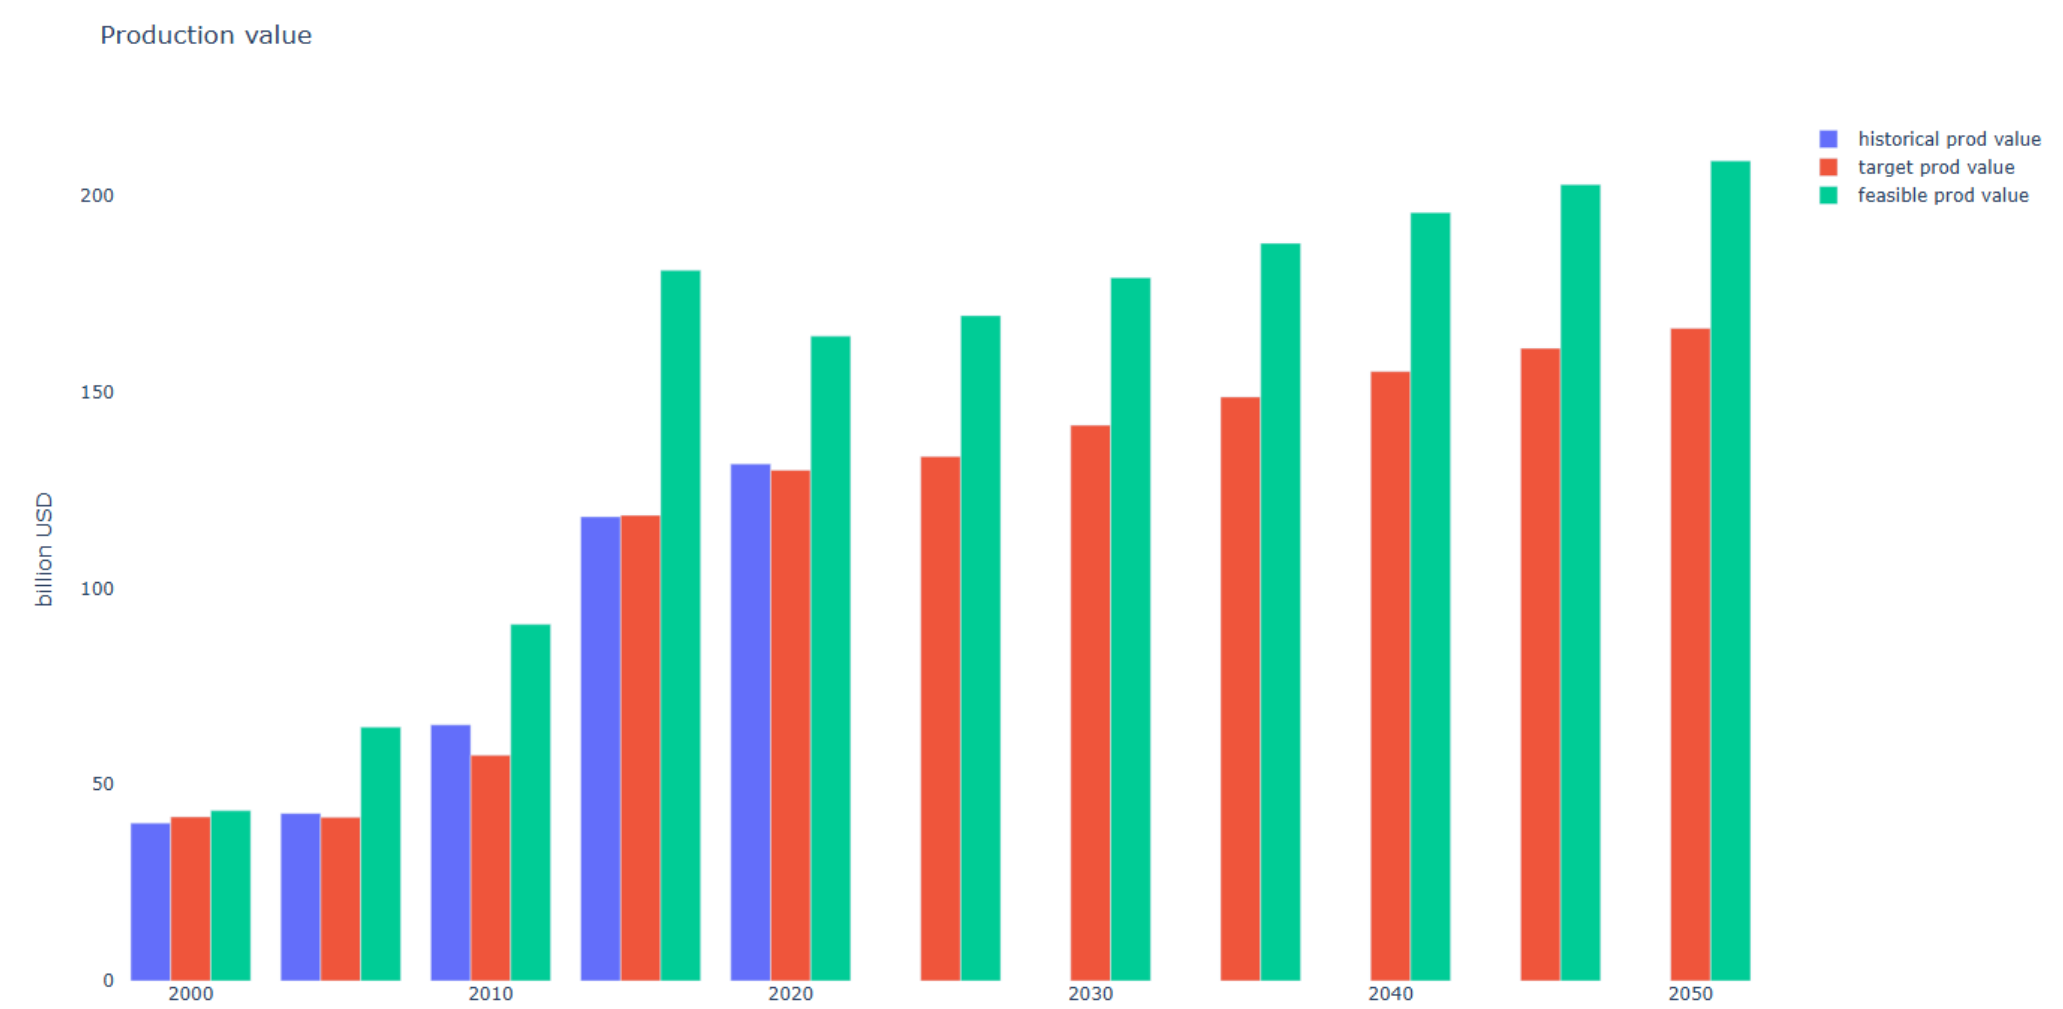

Scenarios: Balanced, Current Trends, Export Oriented Growth, Food Security, Mitigation, Net-Zero

Scenario: Balanced

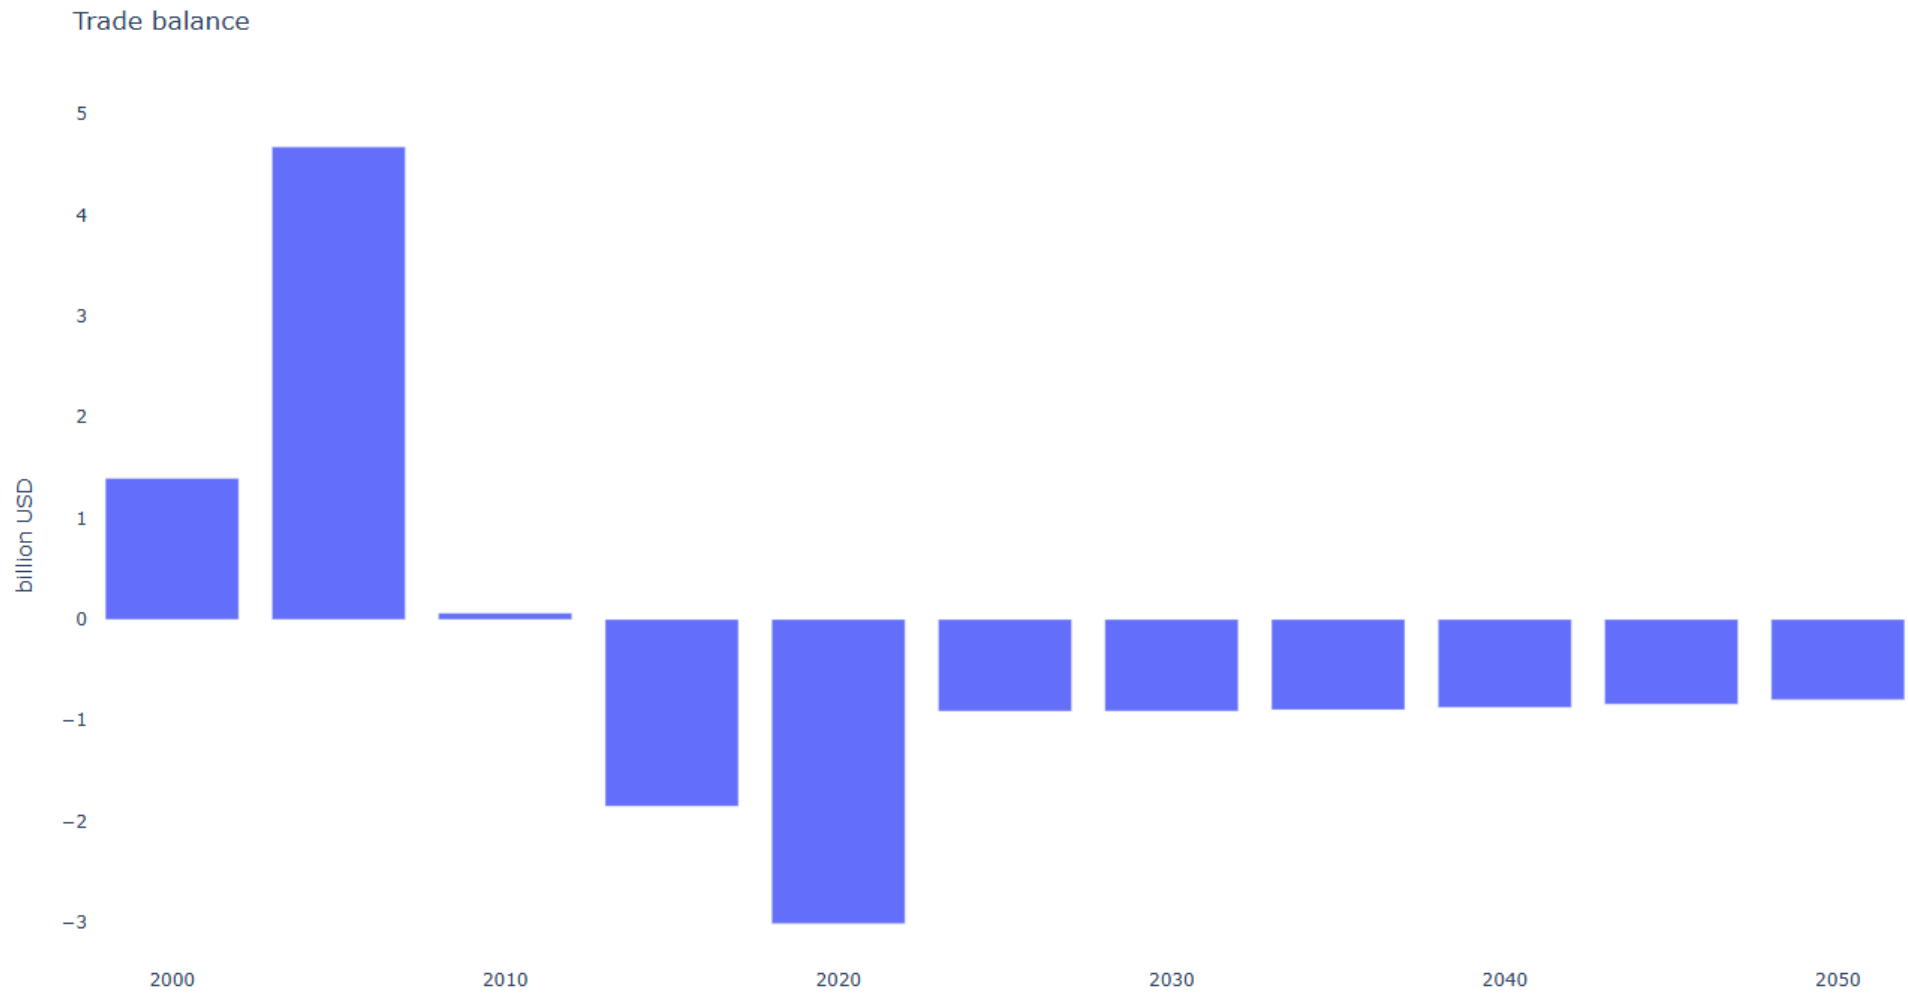

Evolution of total production costs from the main crops

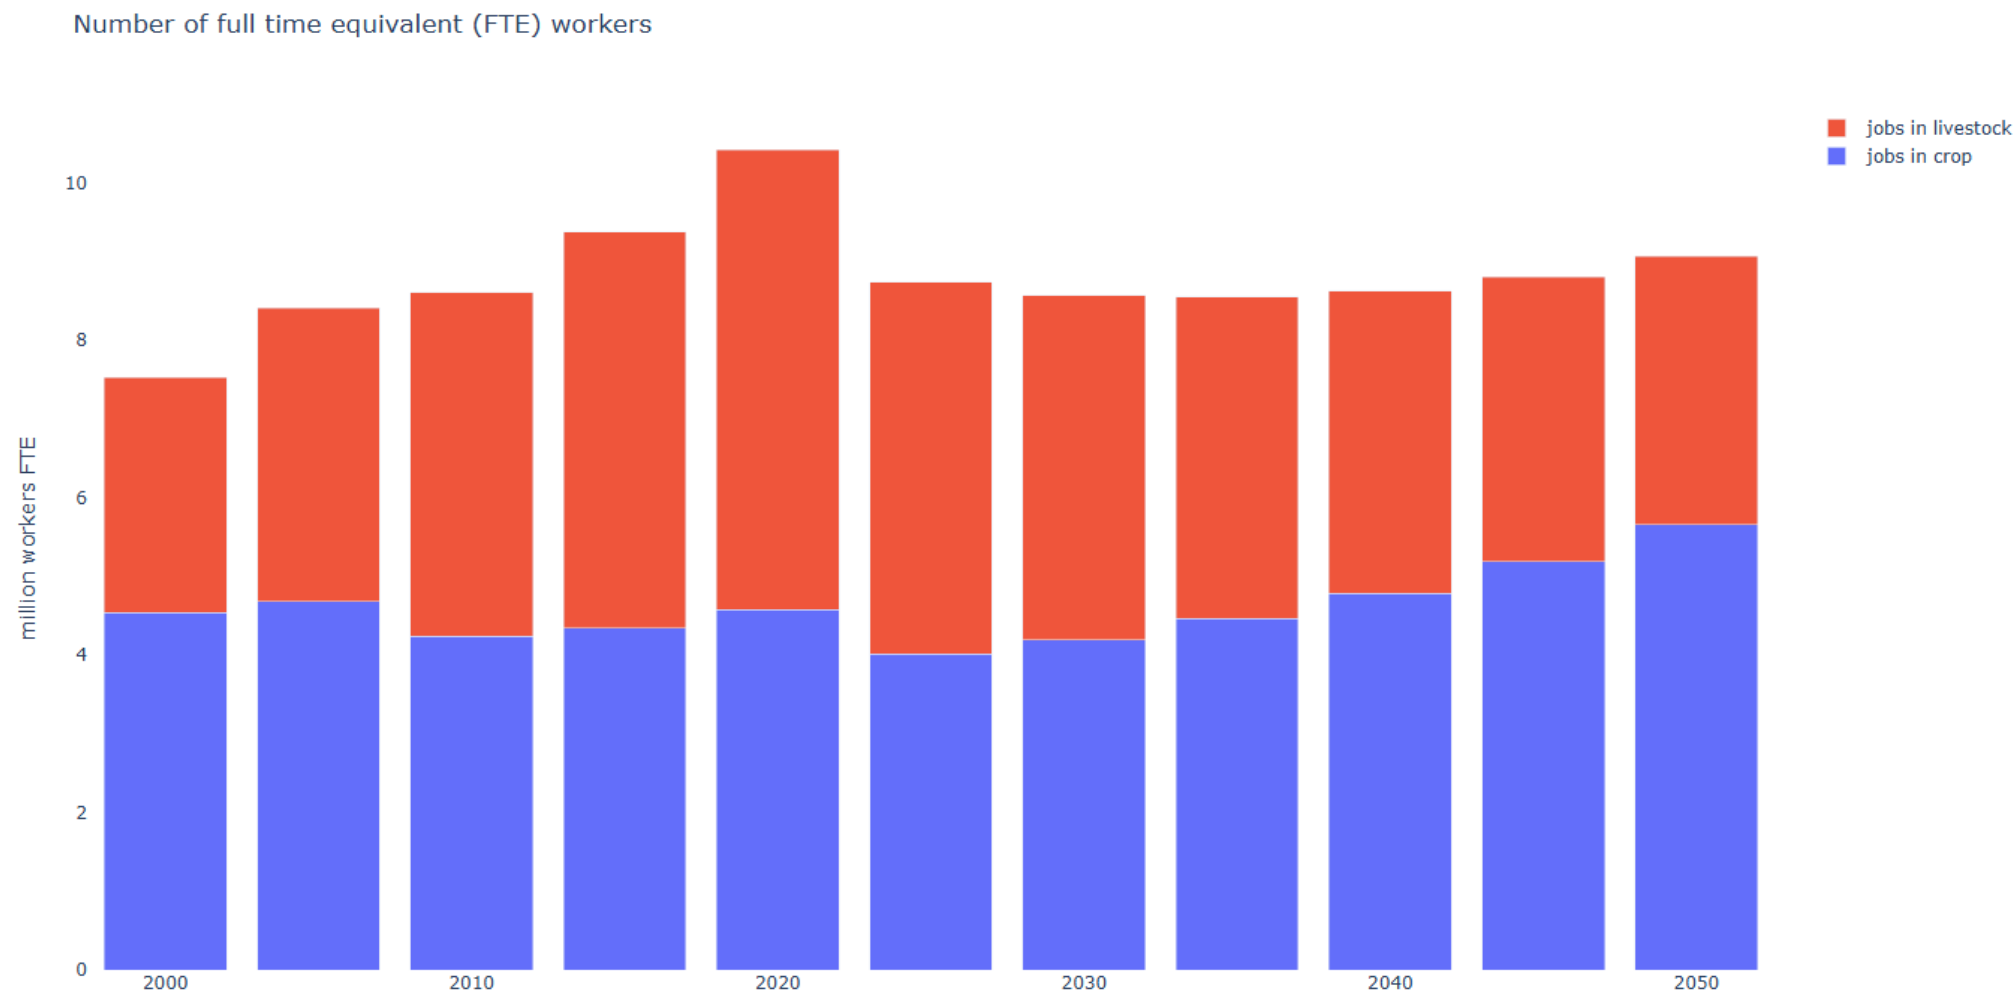

Production value

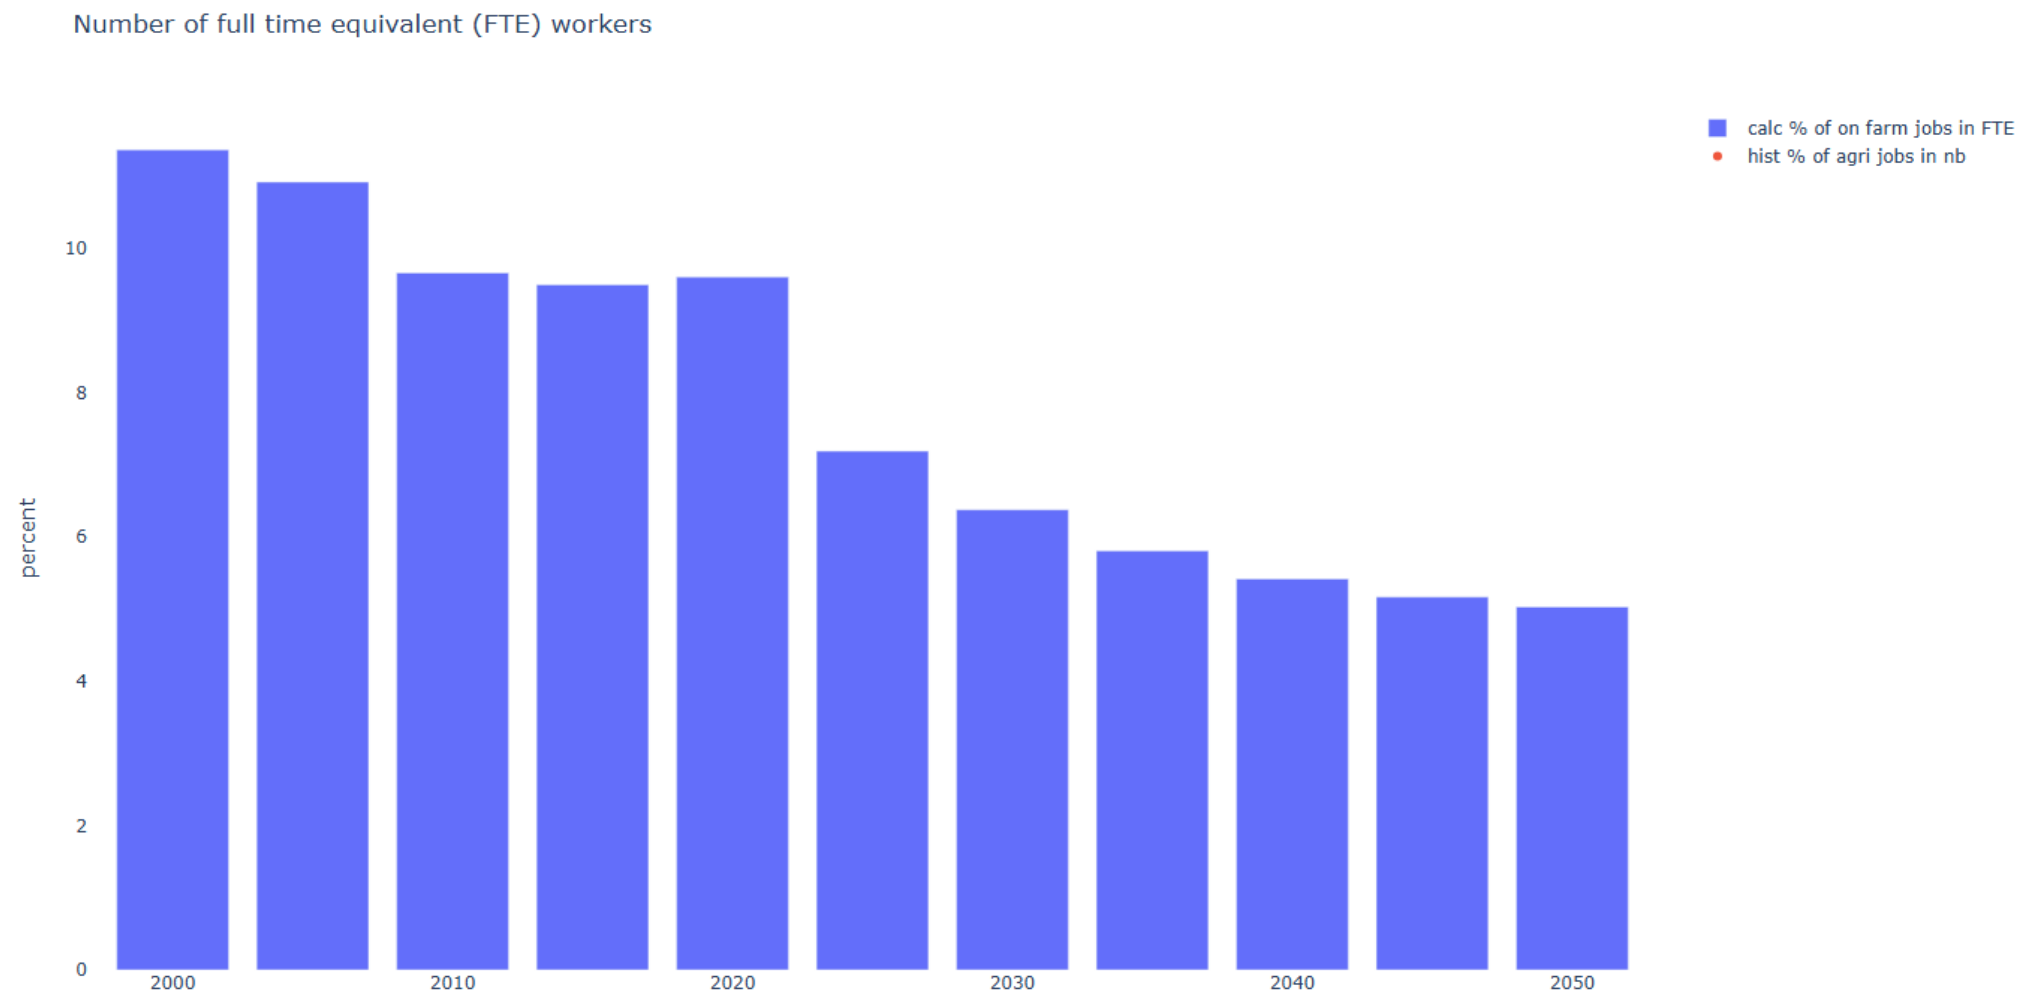

Trade balance

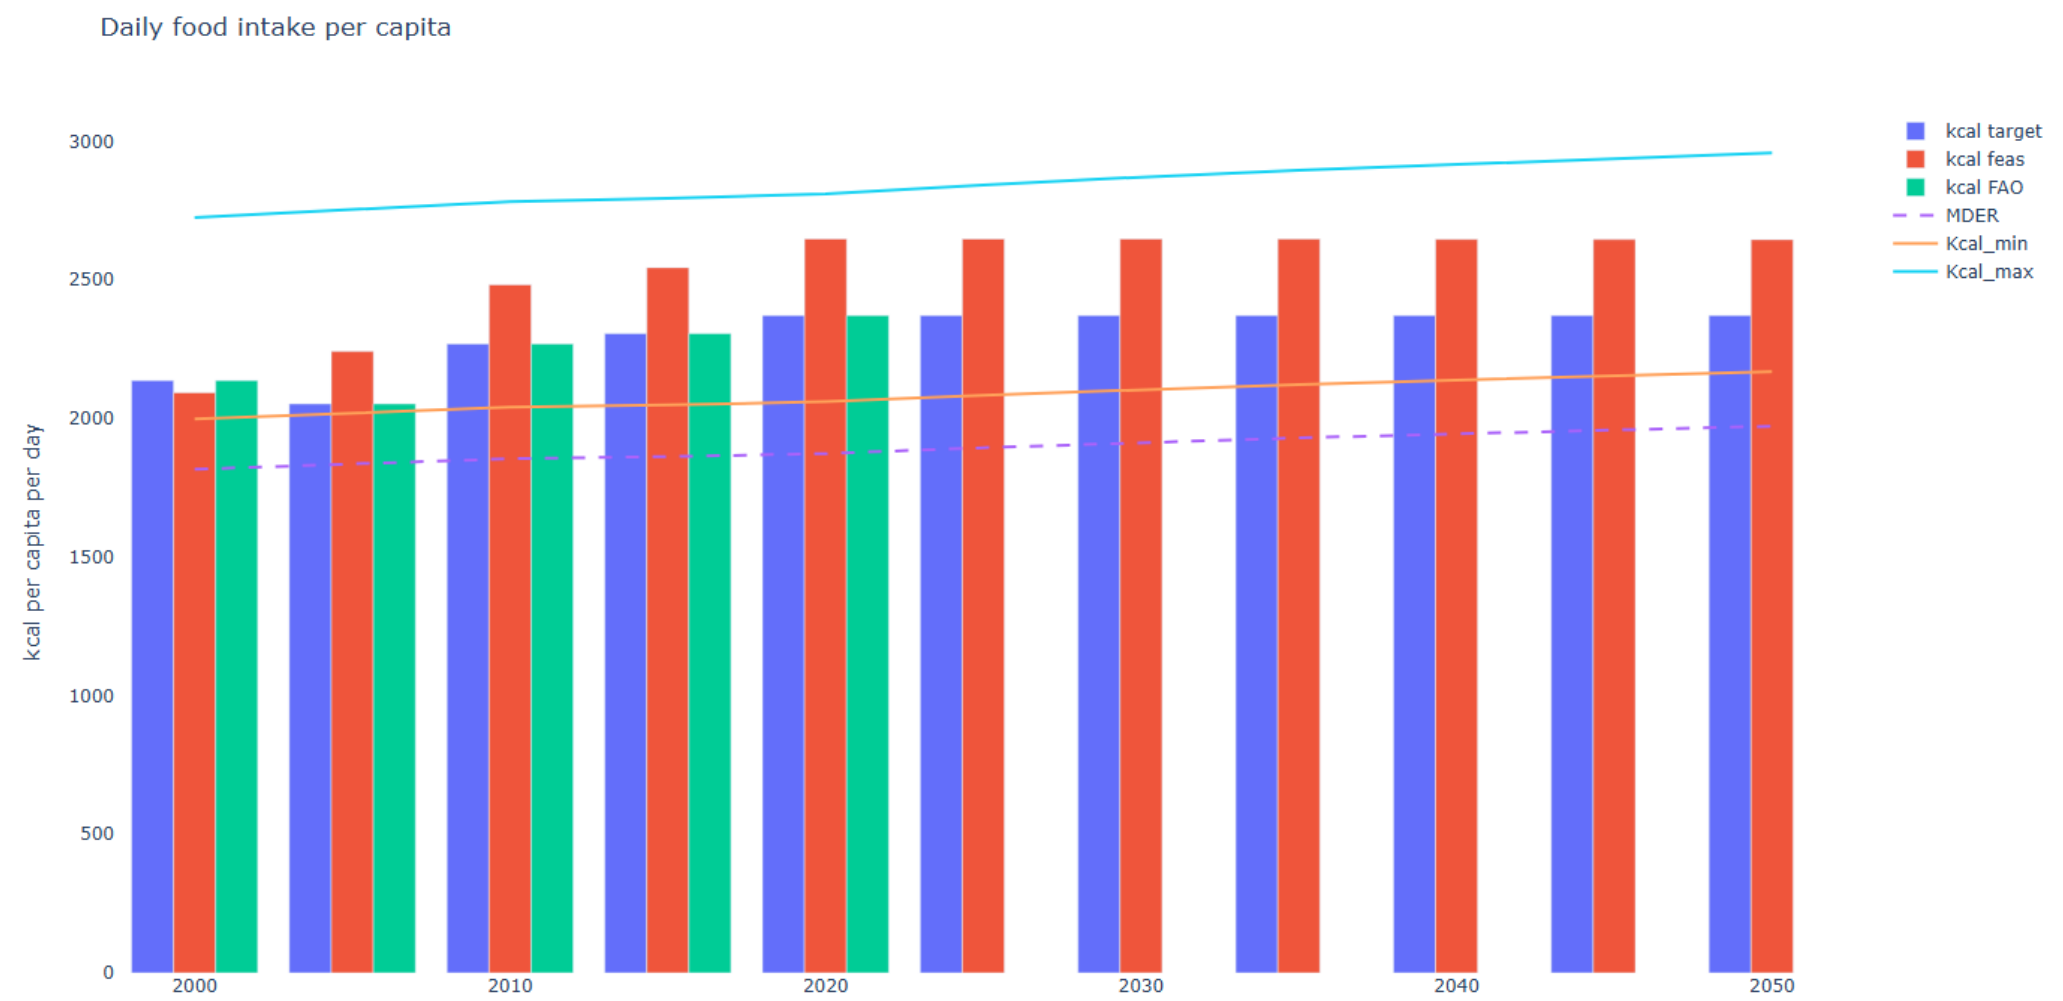

Number of full time equivalent (FTE) workers

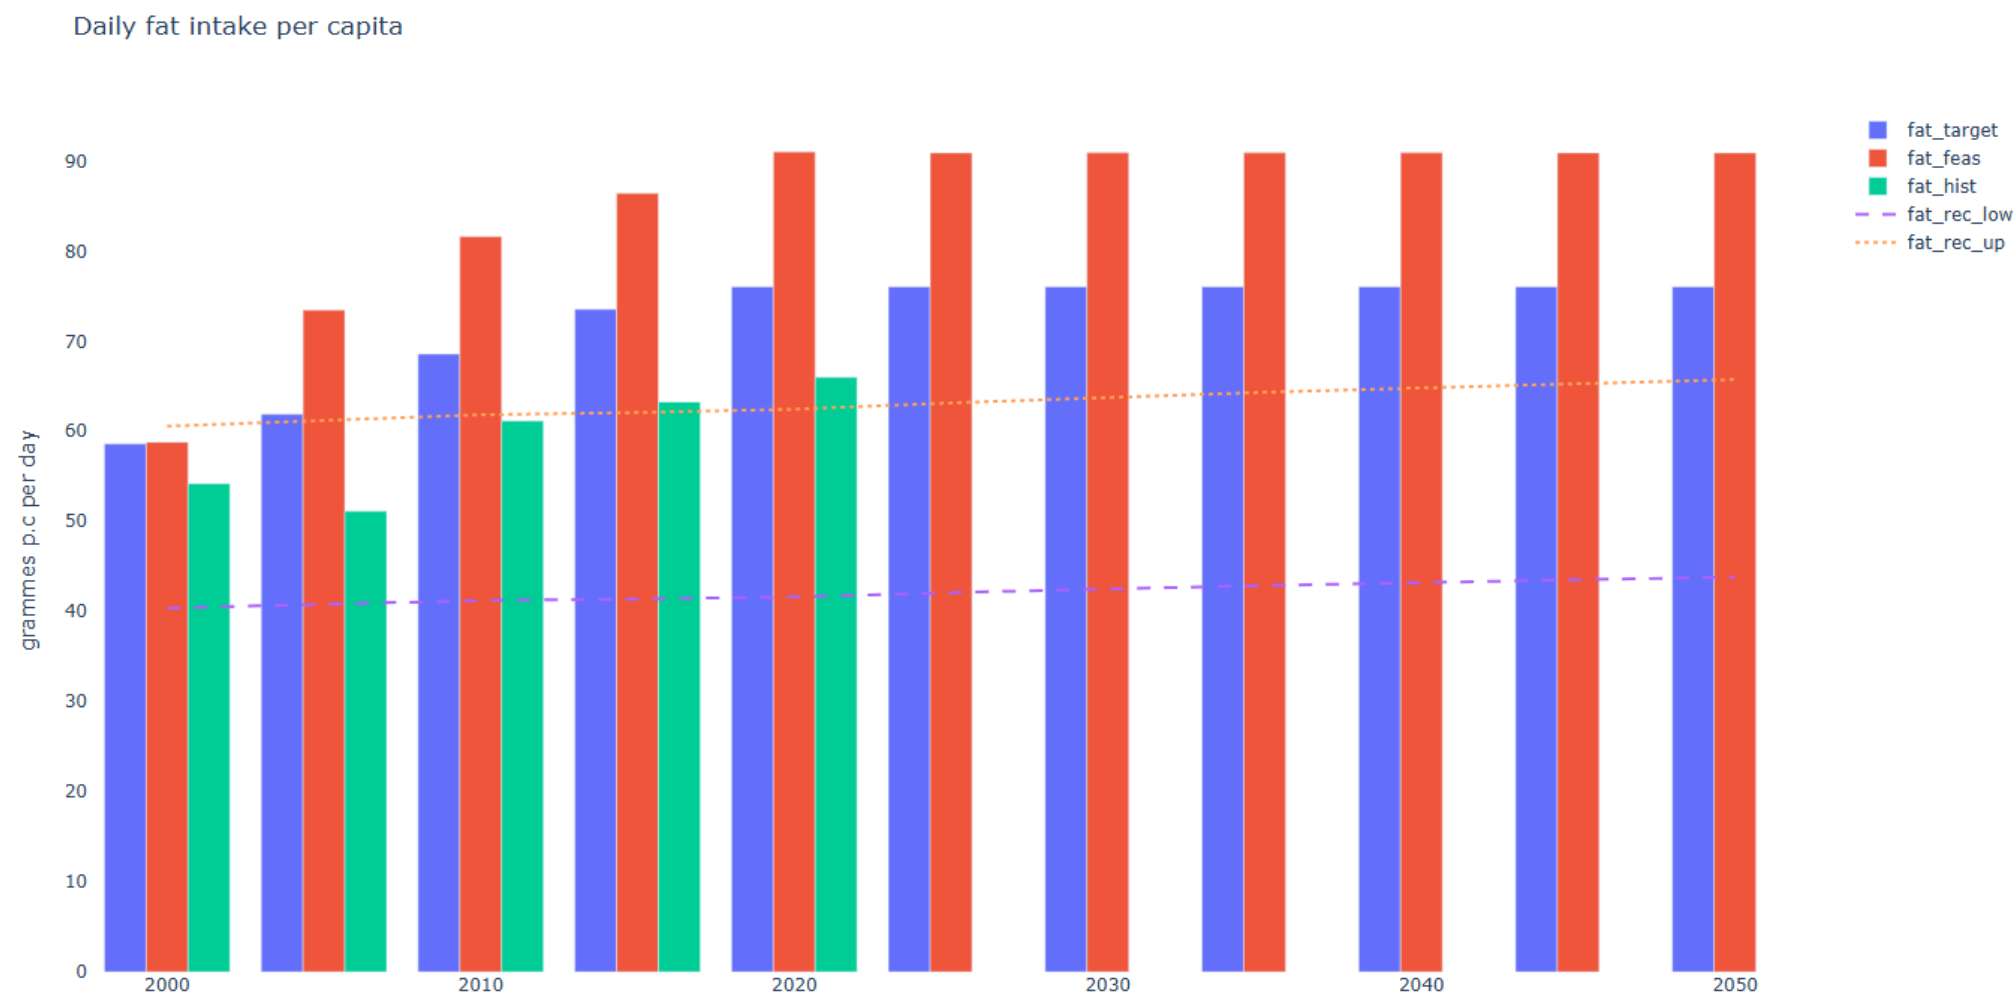

Number of full time equivalent (FTE) workers

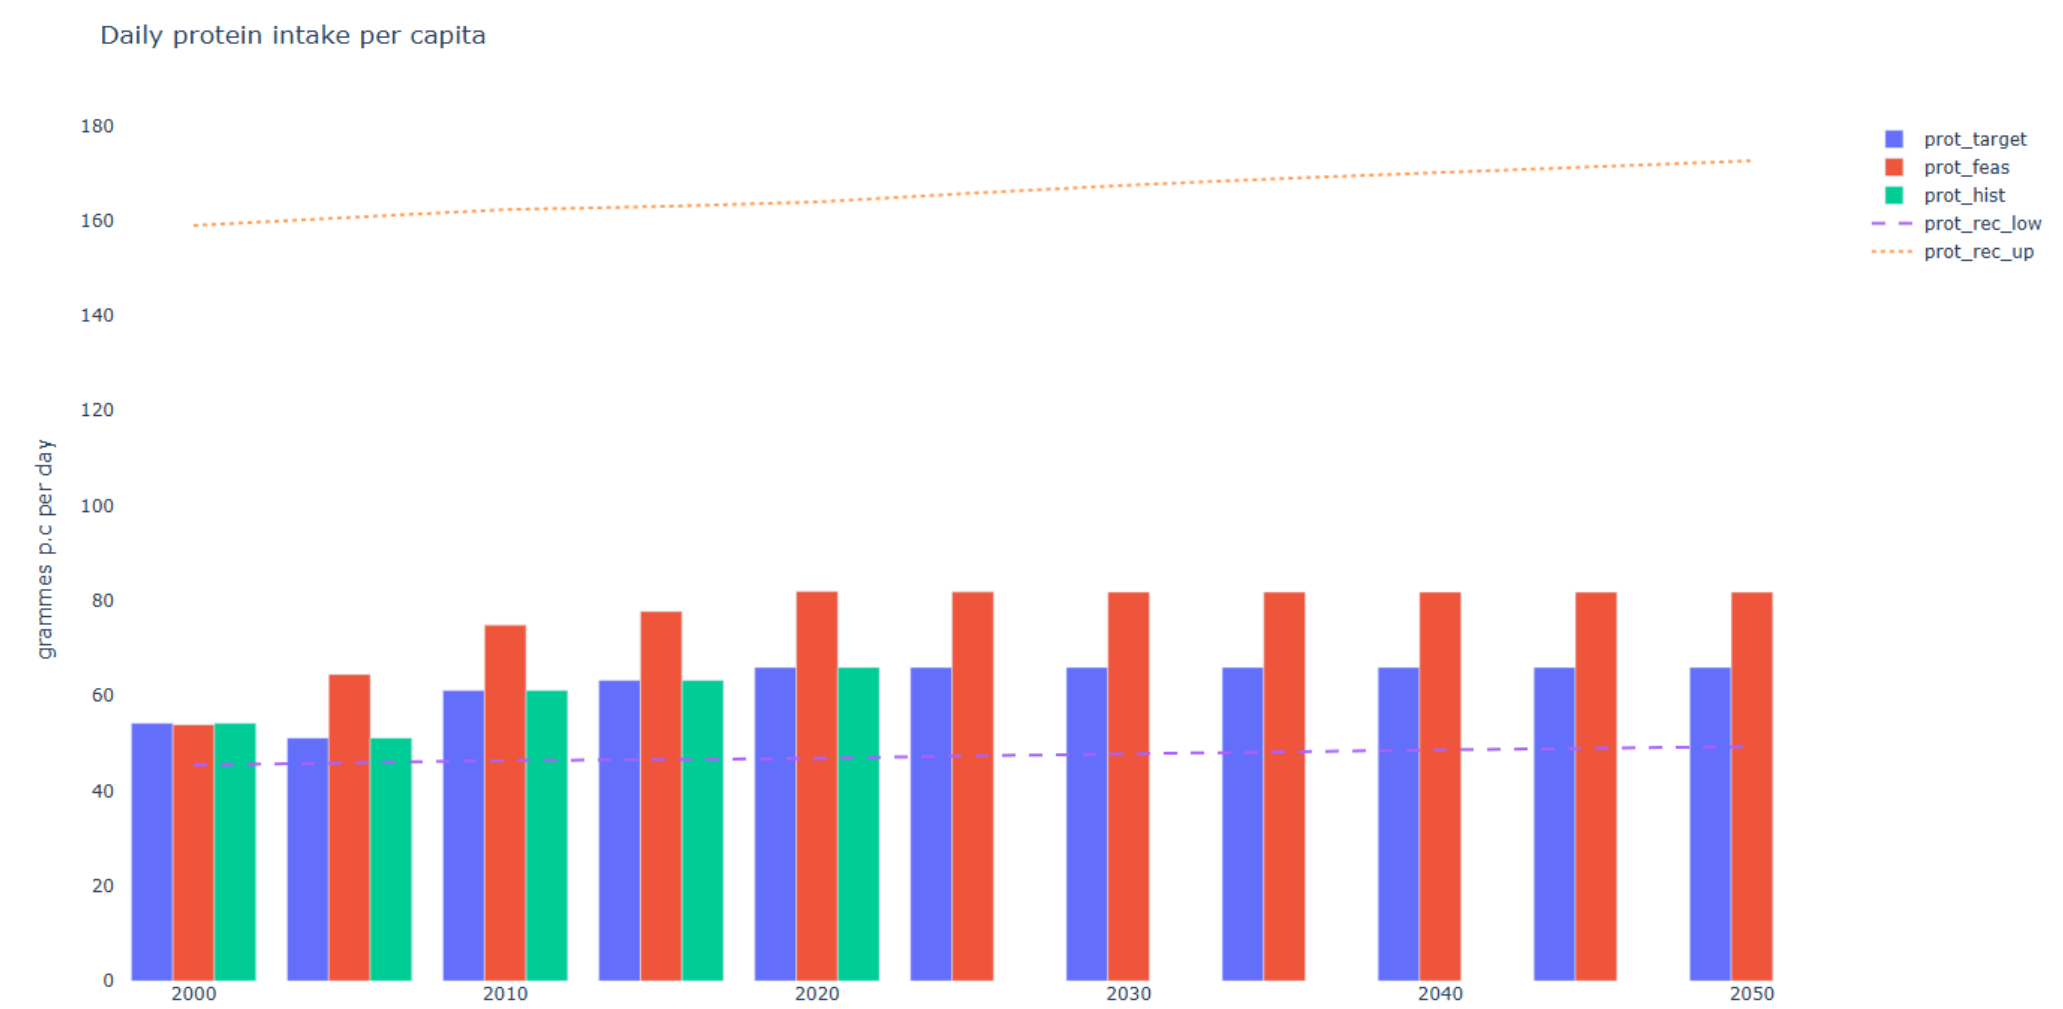

Daily food intake per capita

Daily fat intake per capita

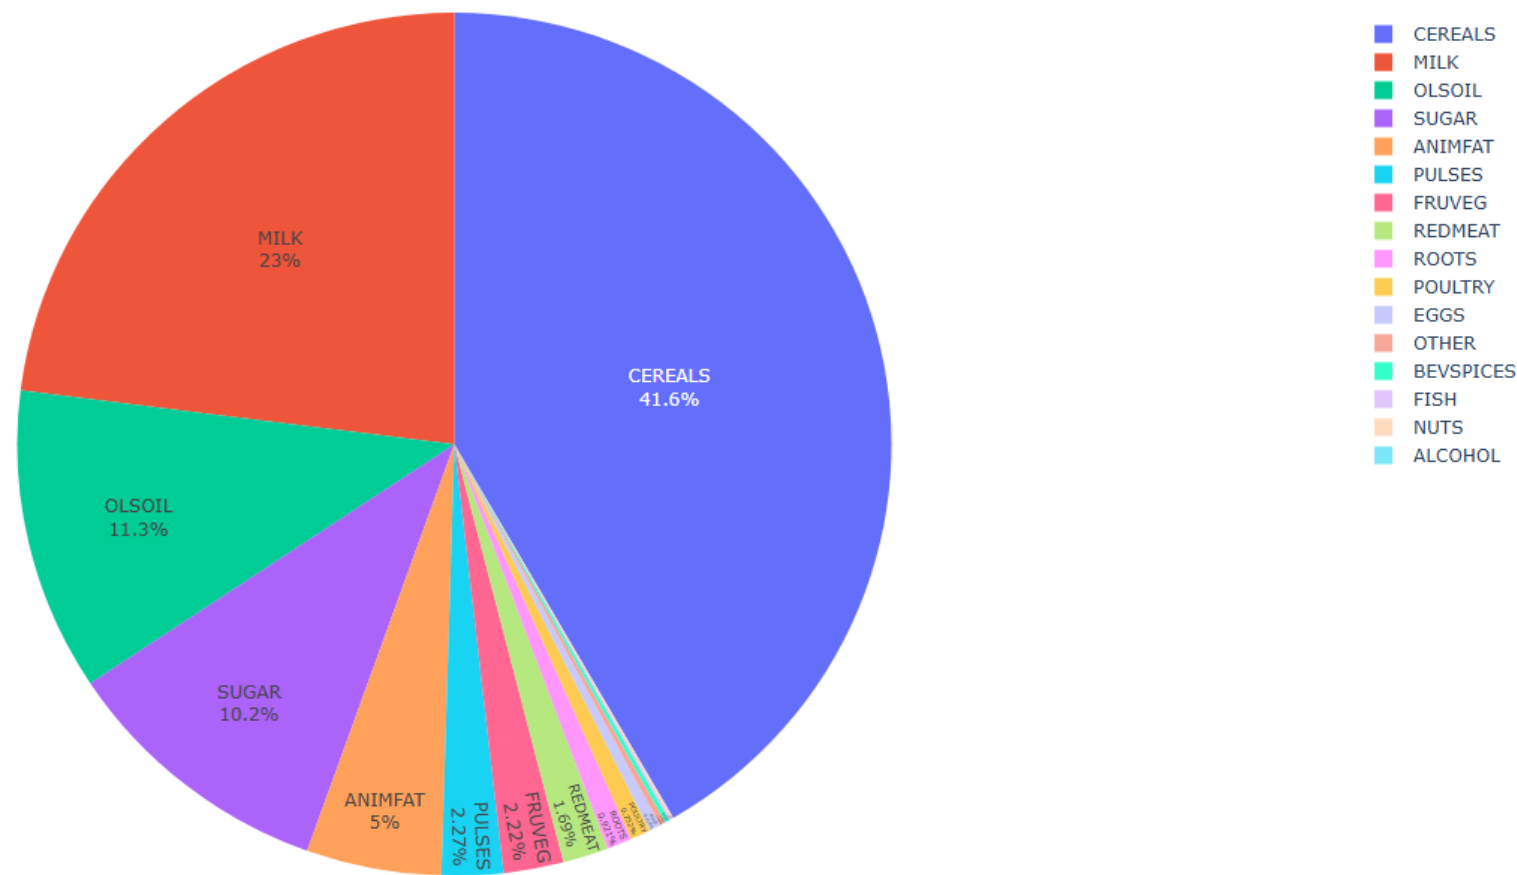

Daily protein intake per capita

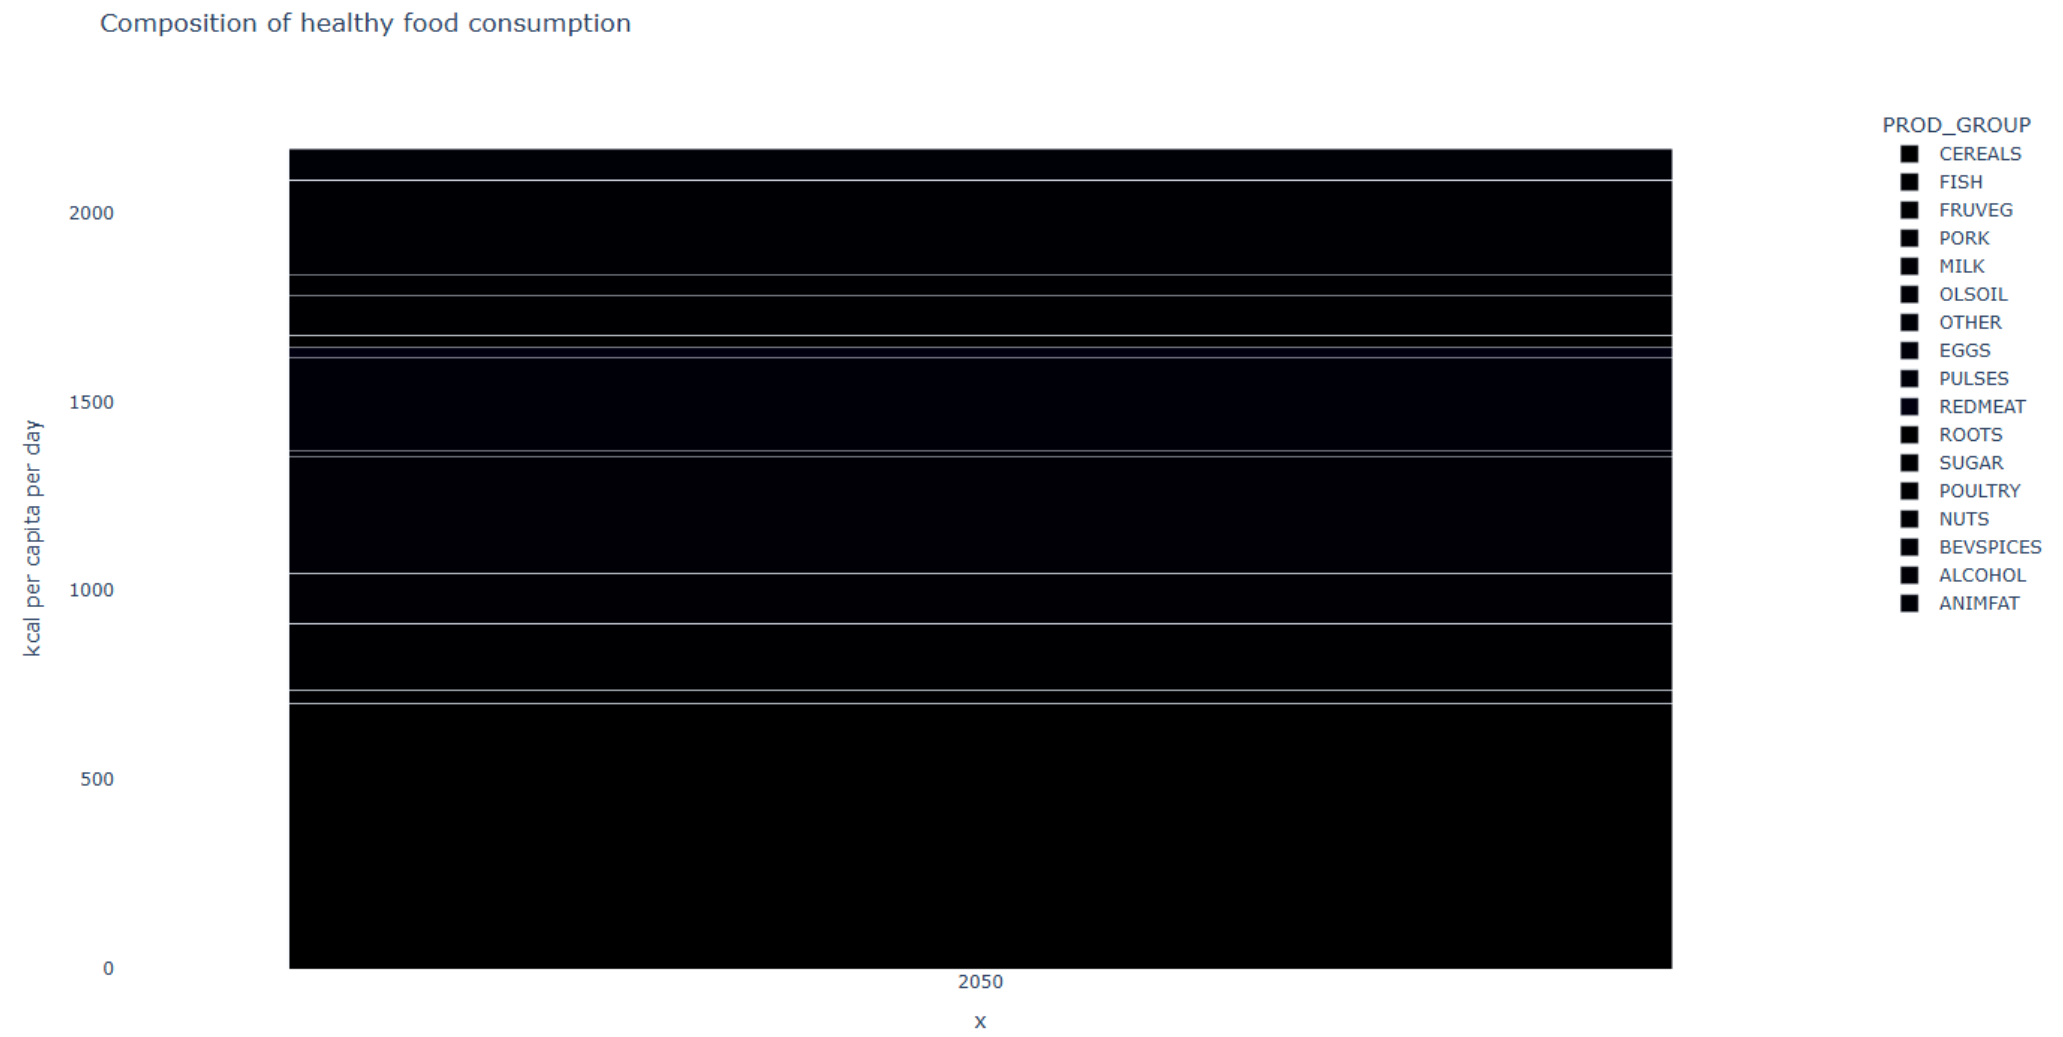

Diet mix (2050)

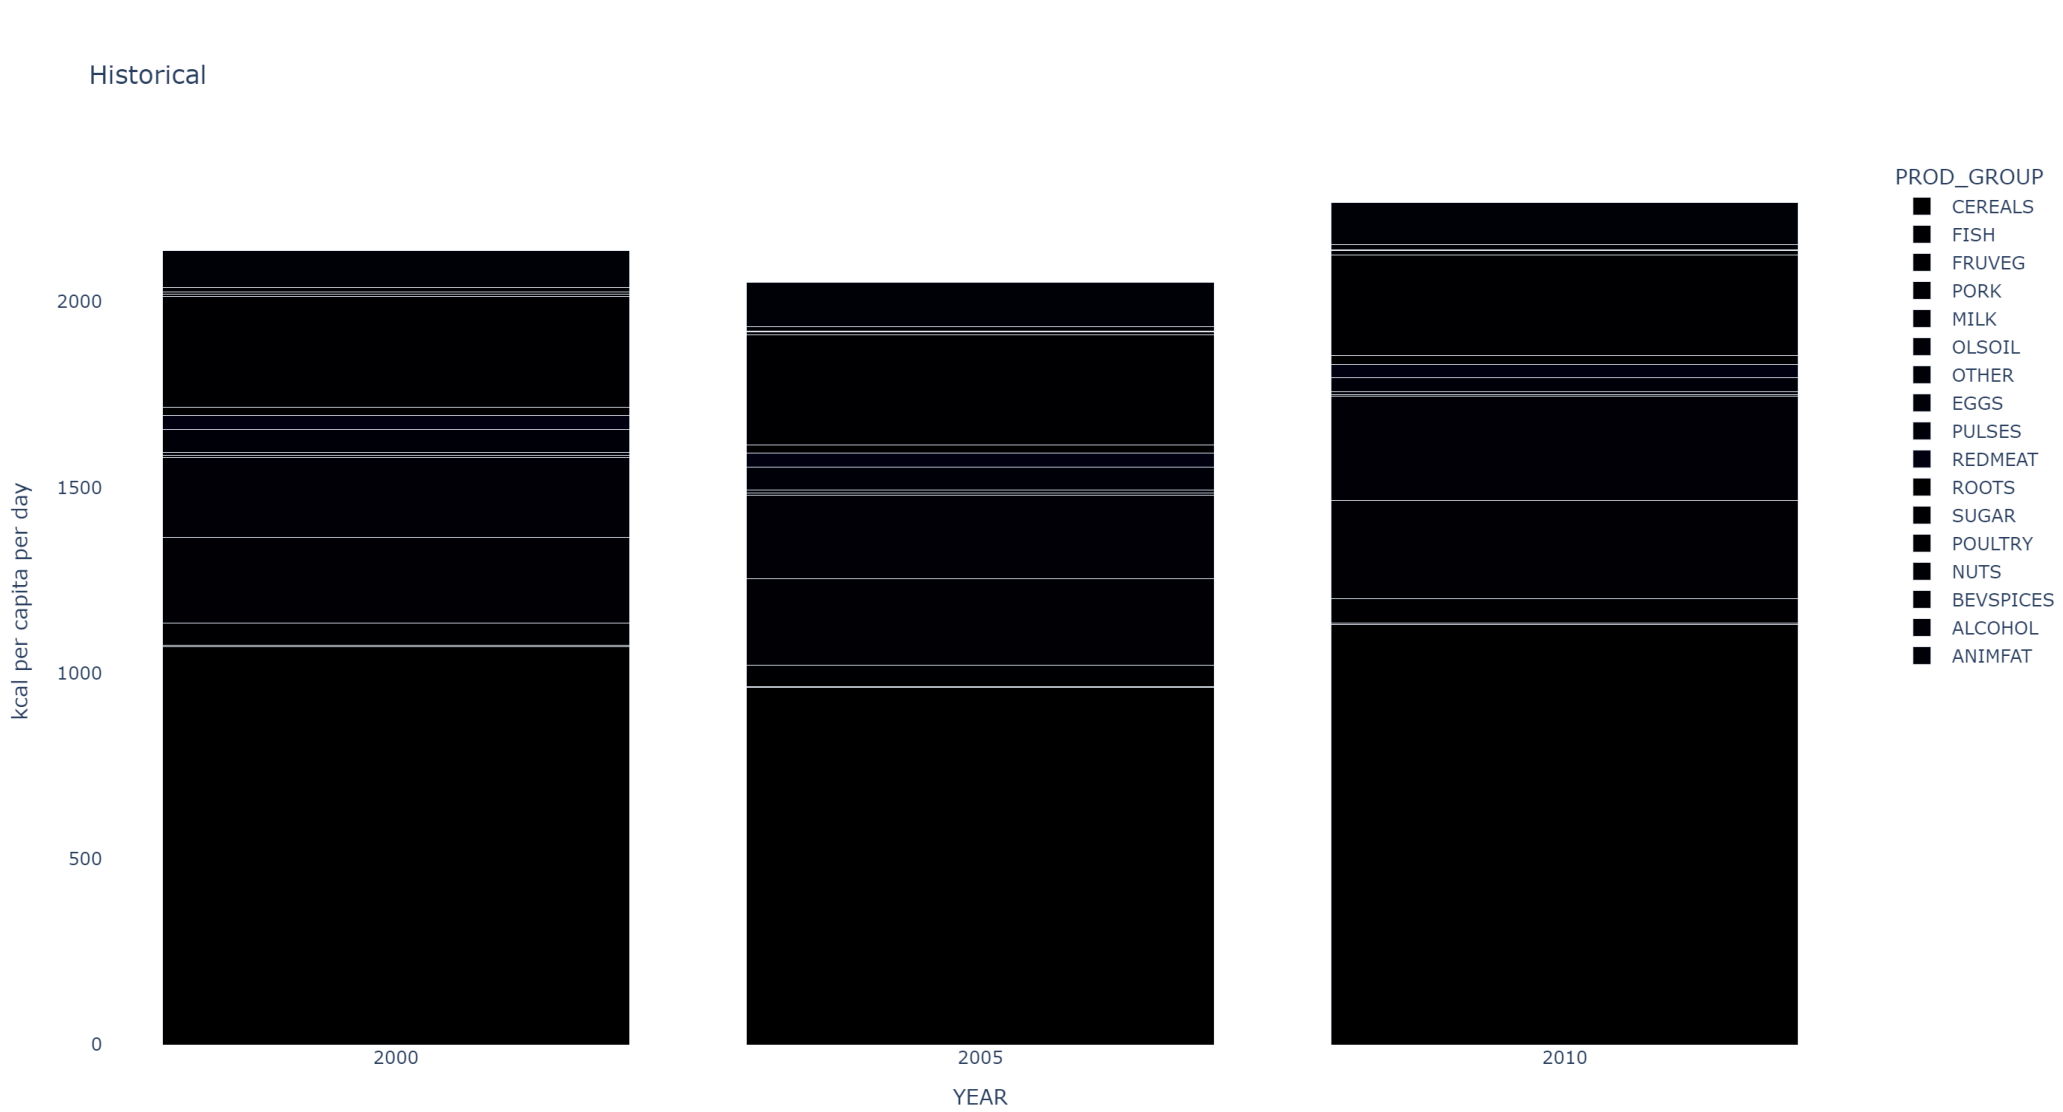

Diet mix (2050)

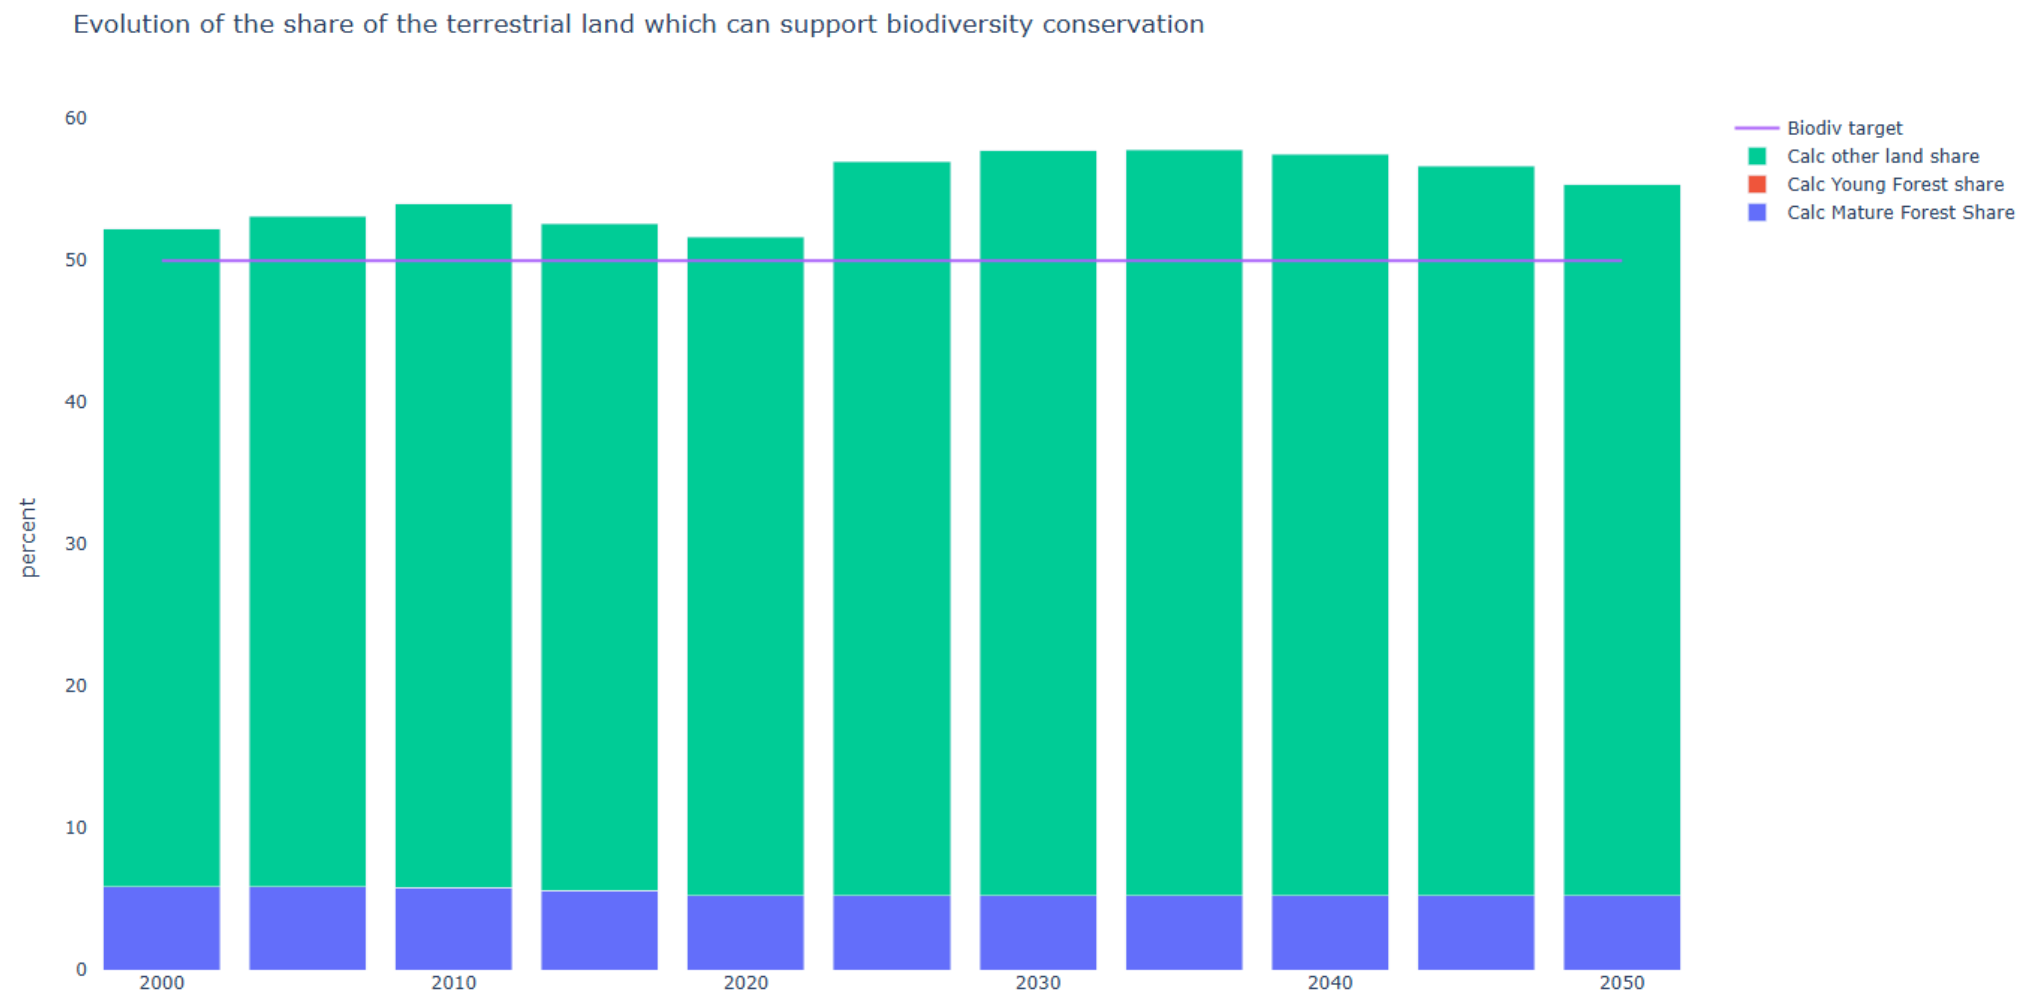

Composition of healthy food consumption

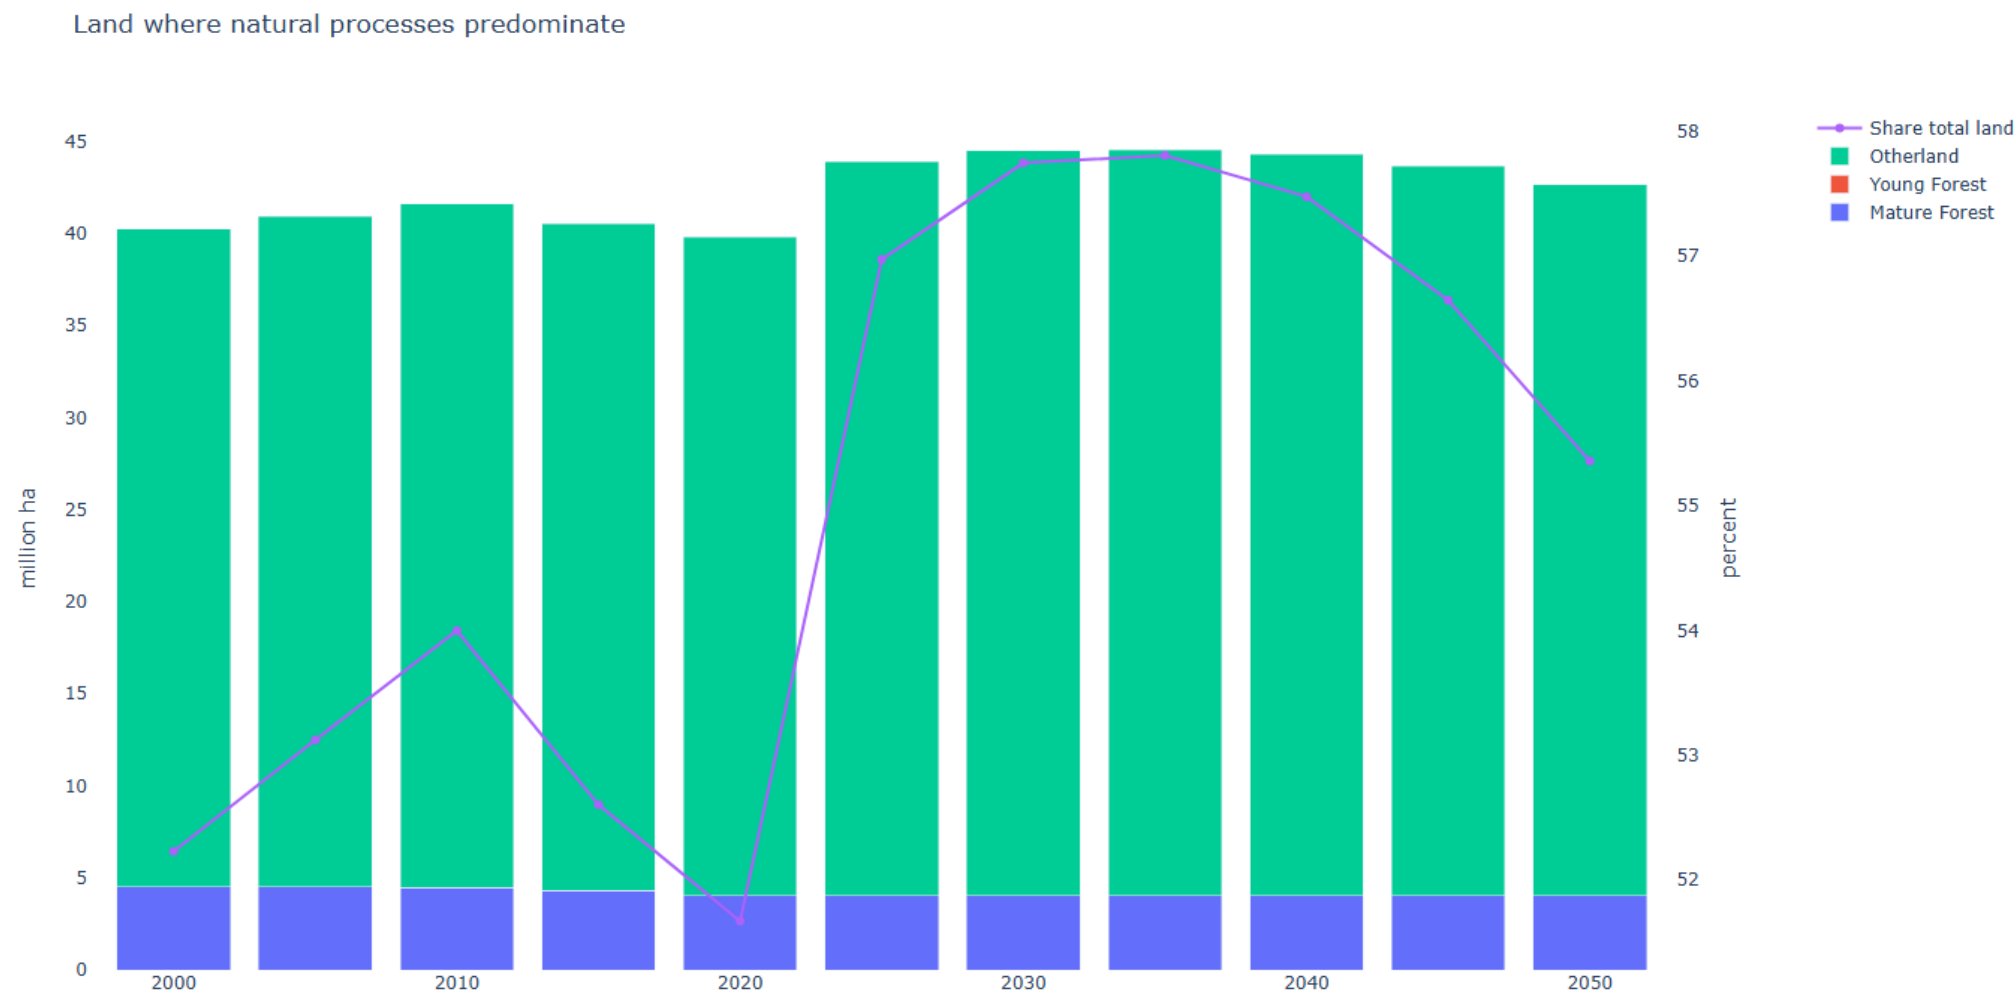

Historical

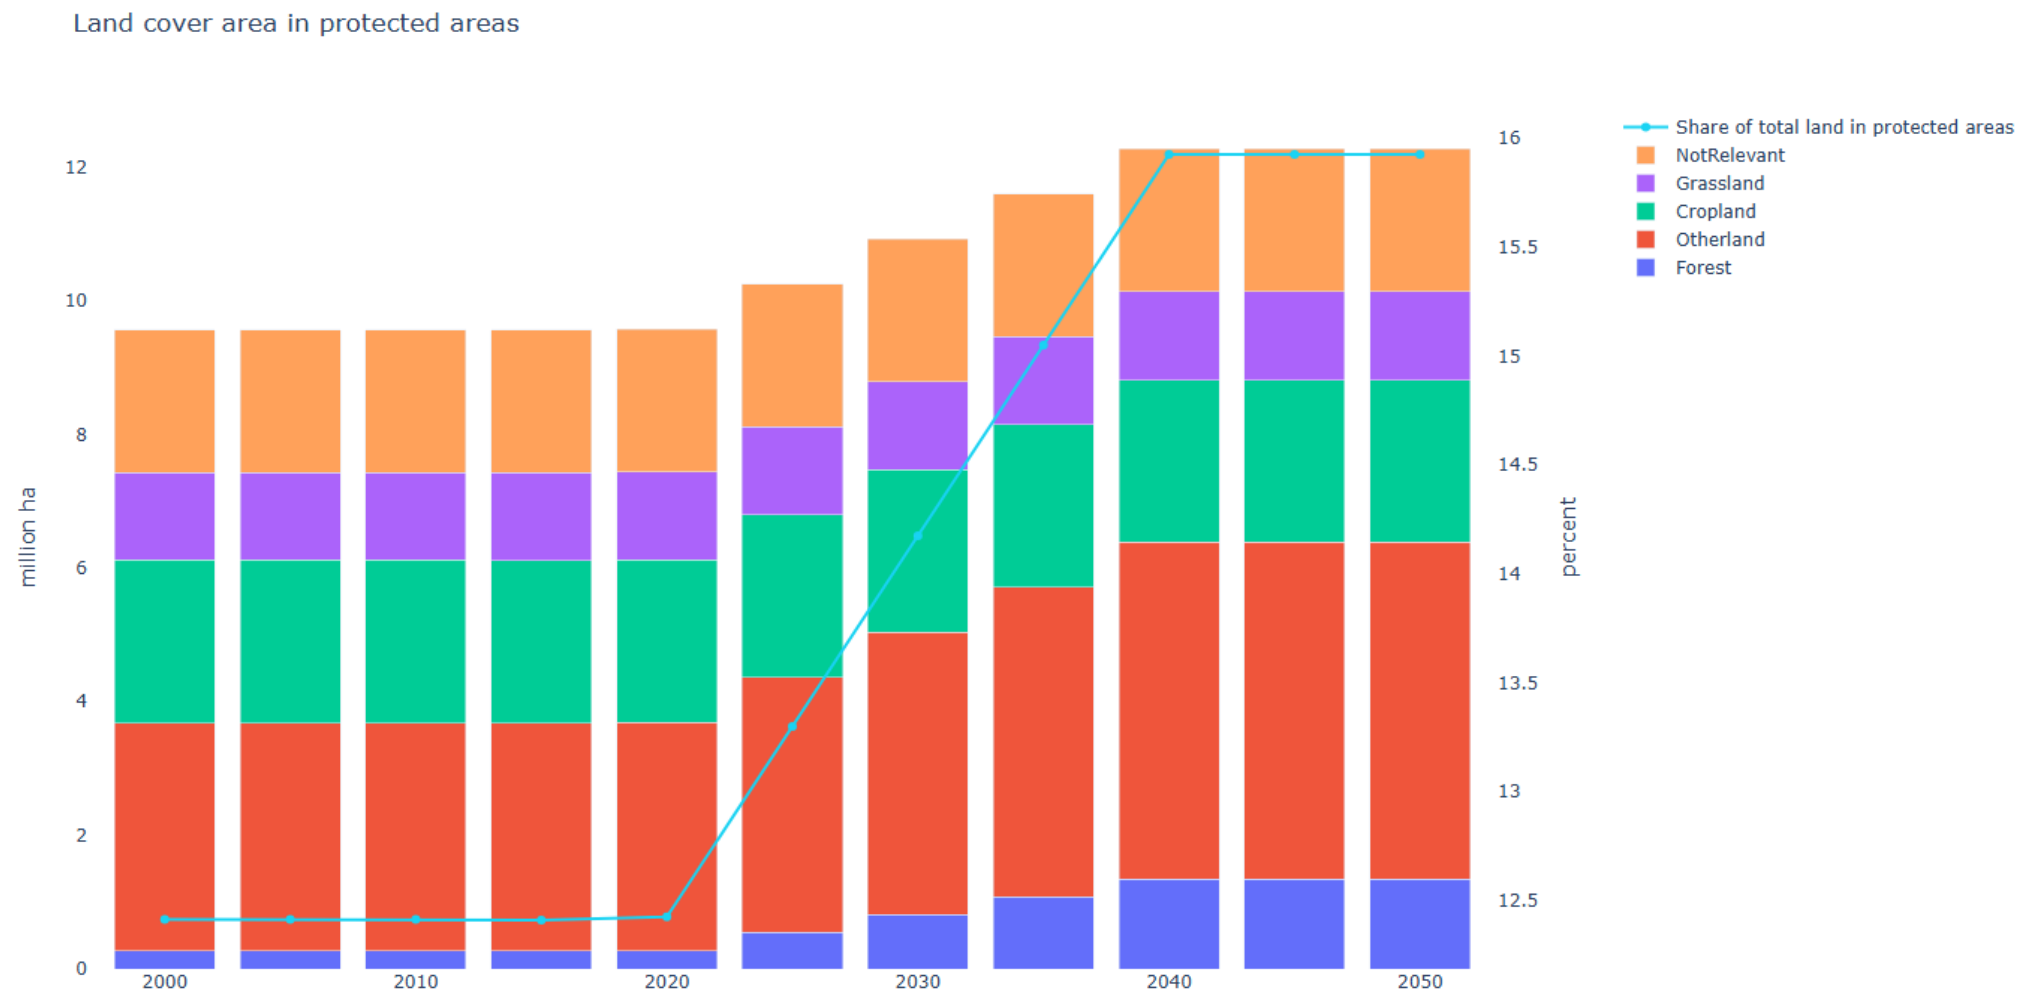

Evolution of the share of the terrestrial land which can support biodiversity conservation

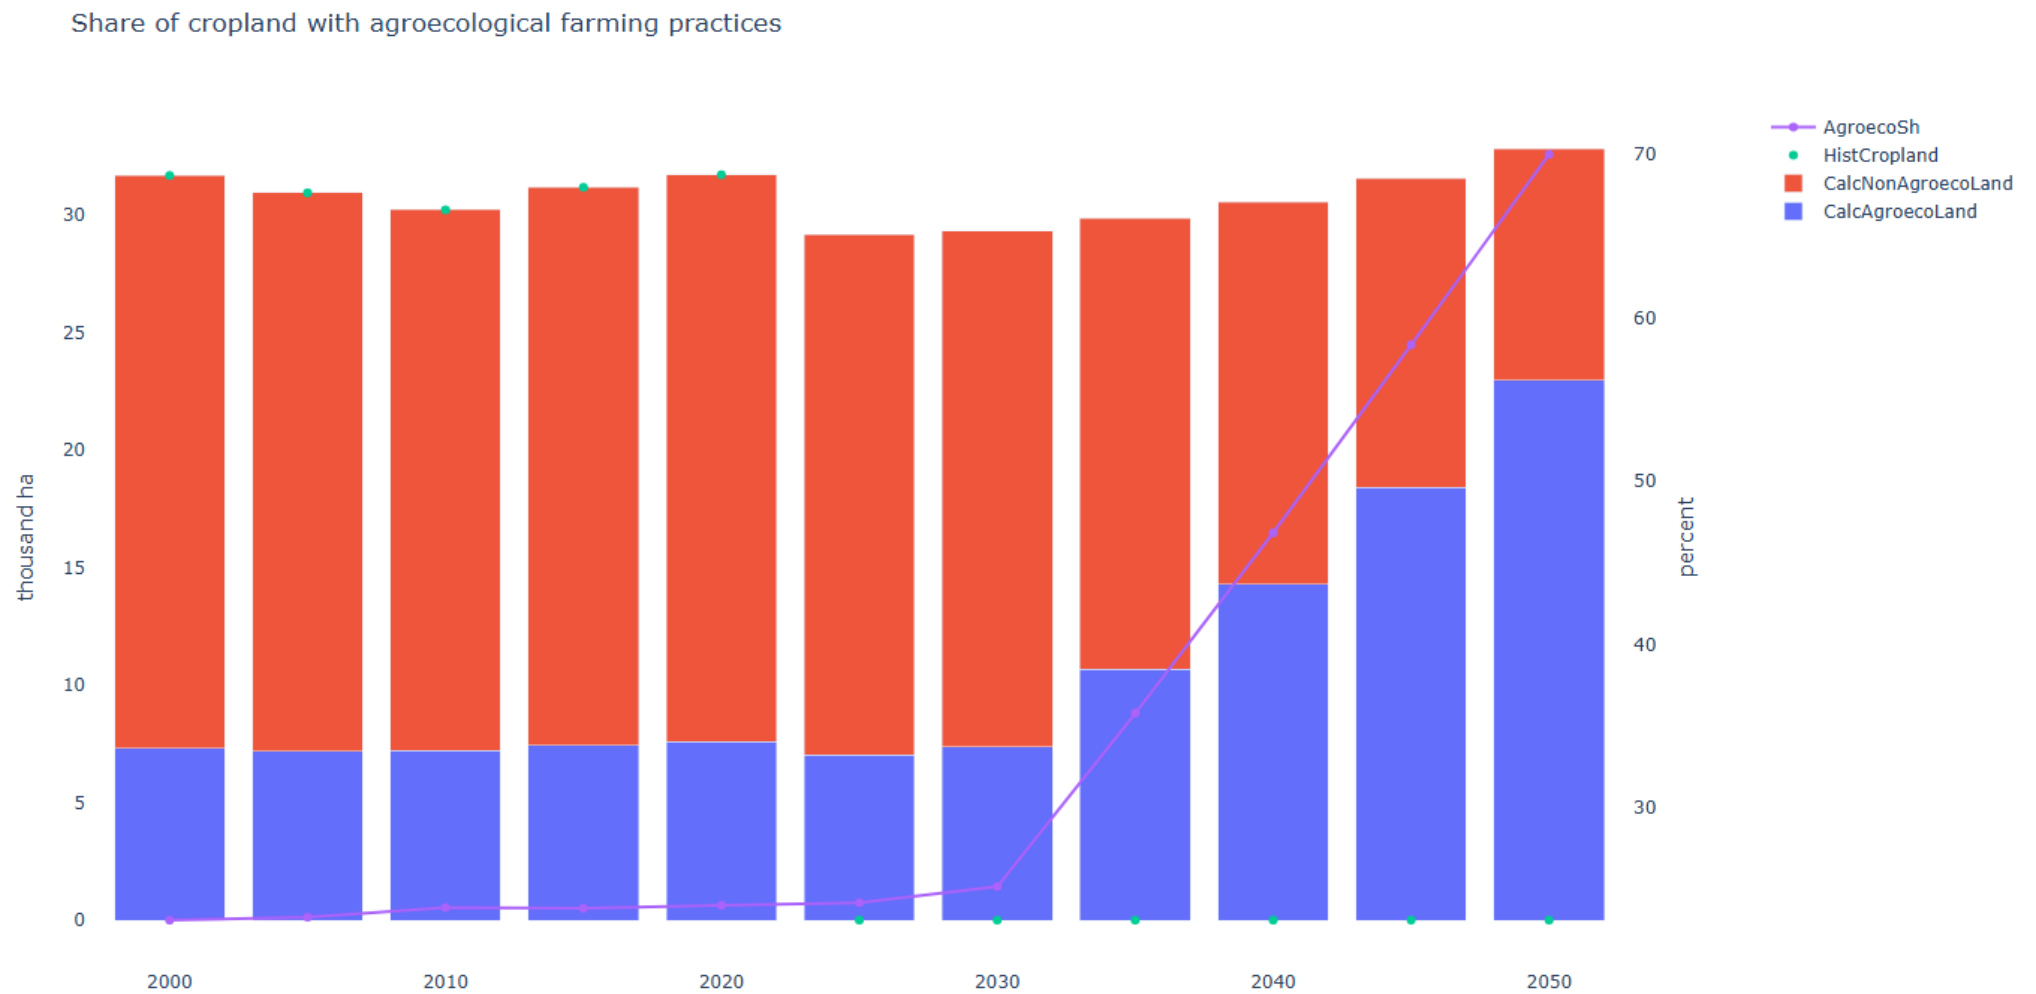

Land where natural processes predominate

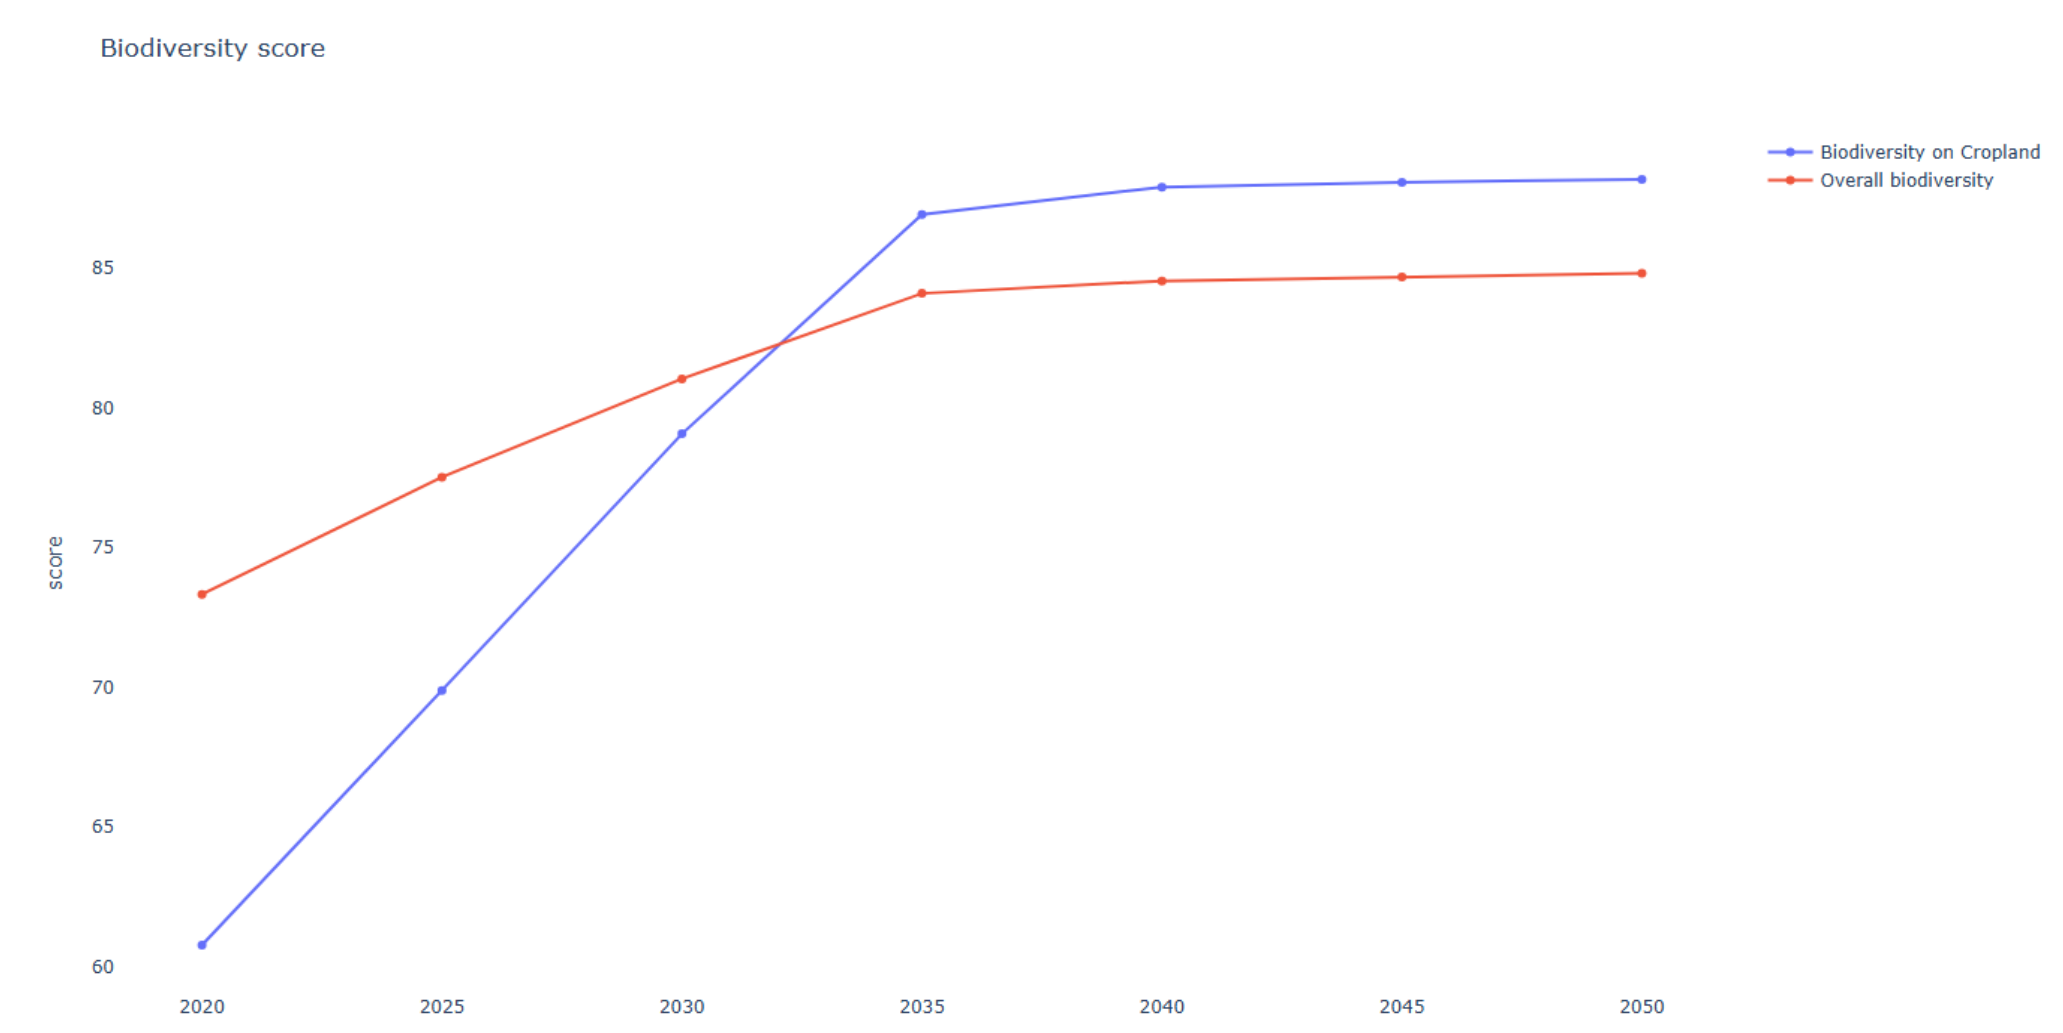

Land cover area in protected areas

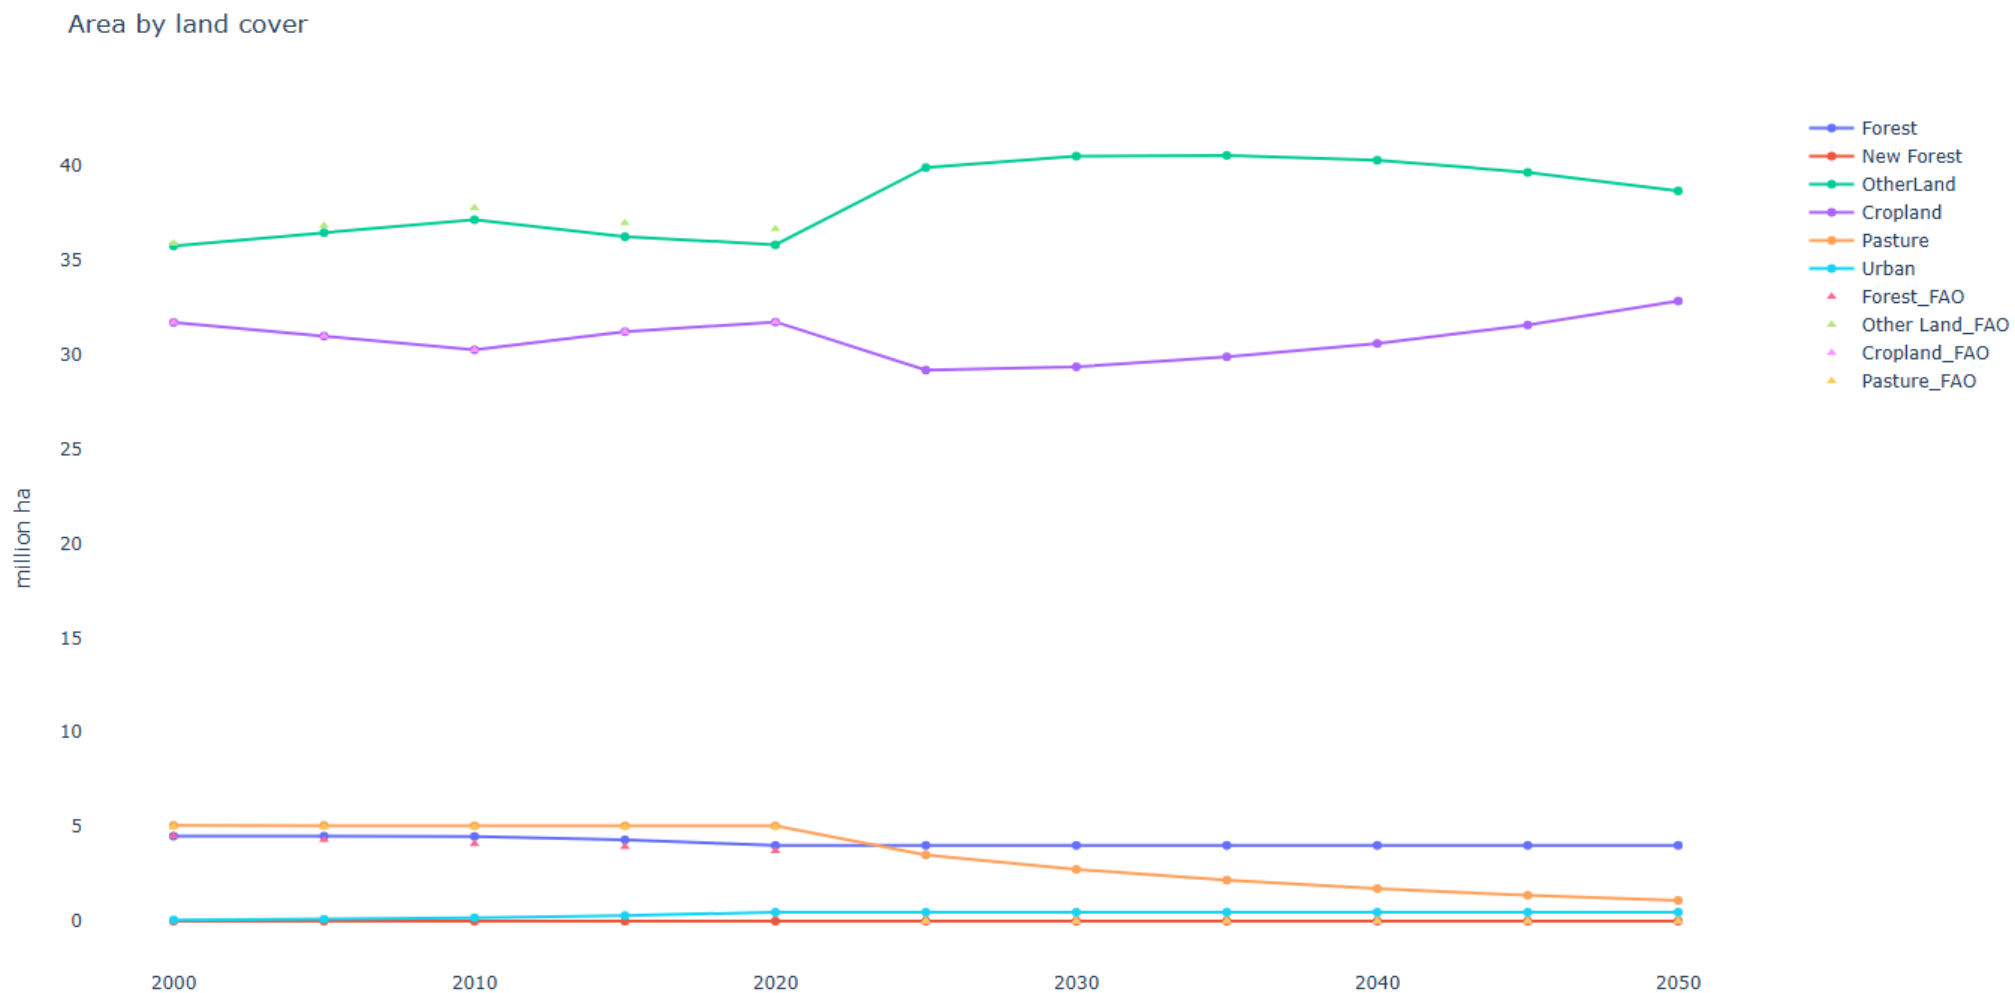

Share of cropland with agroecological farming practices

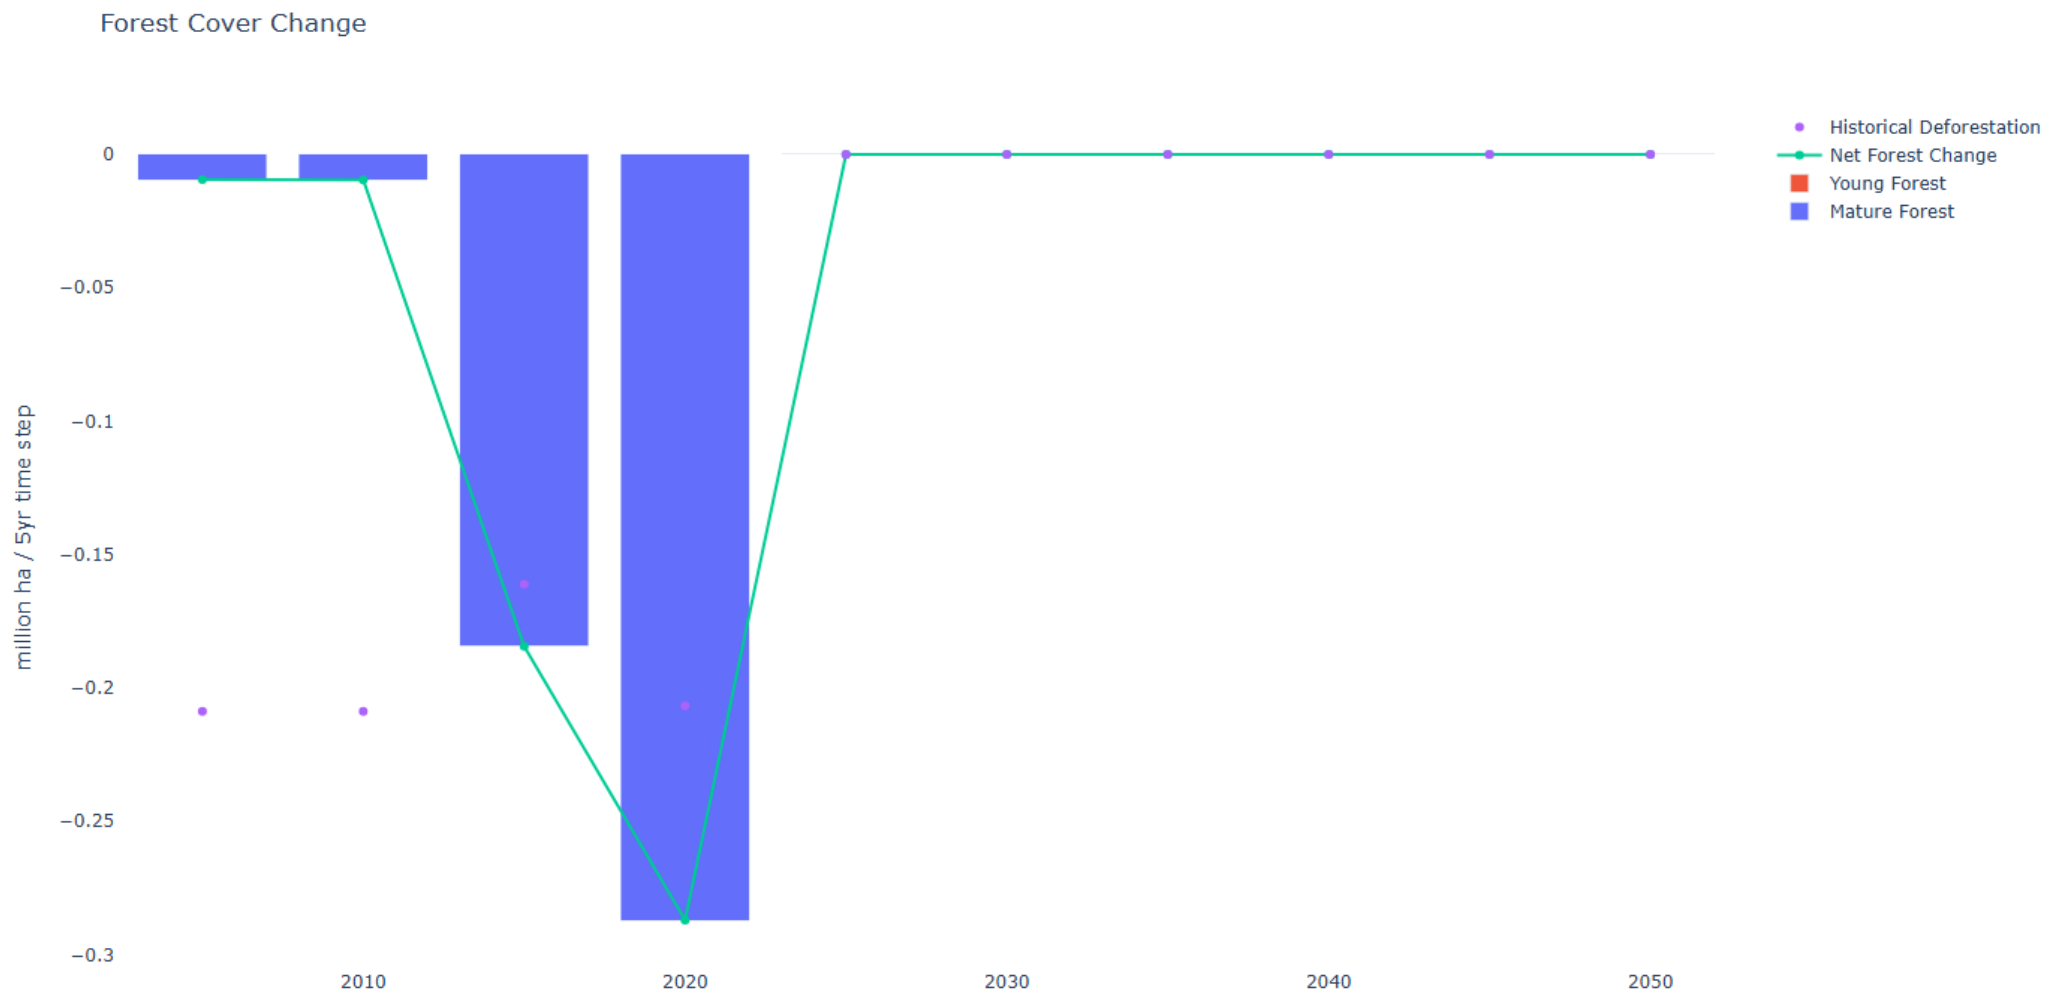

Biodiversity score

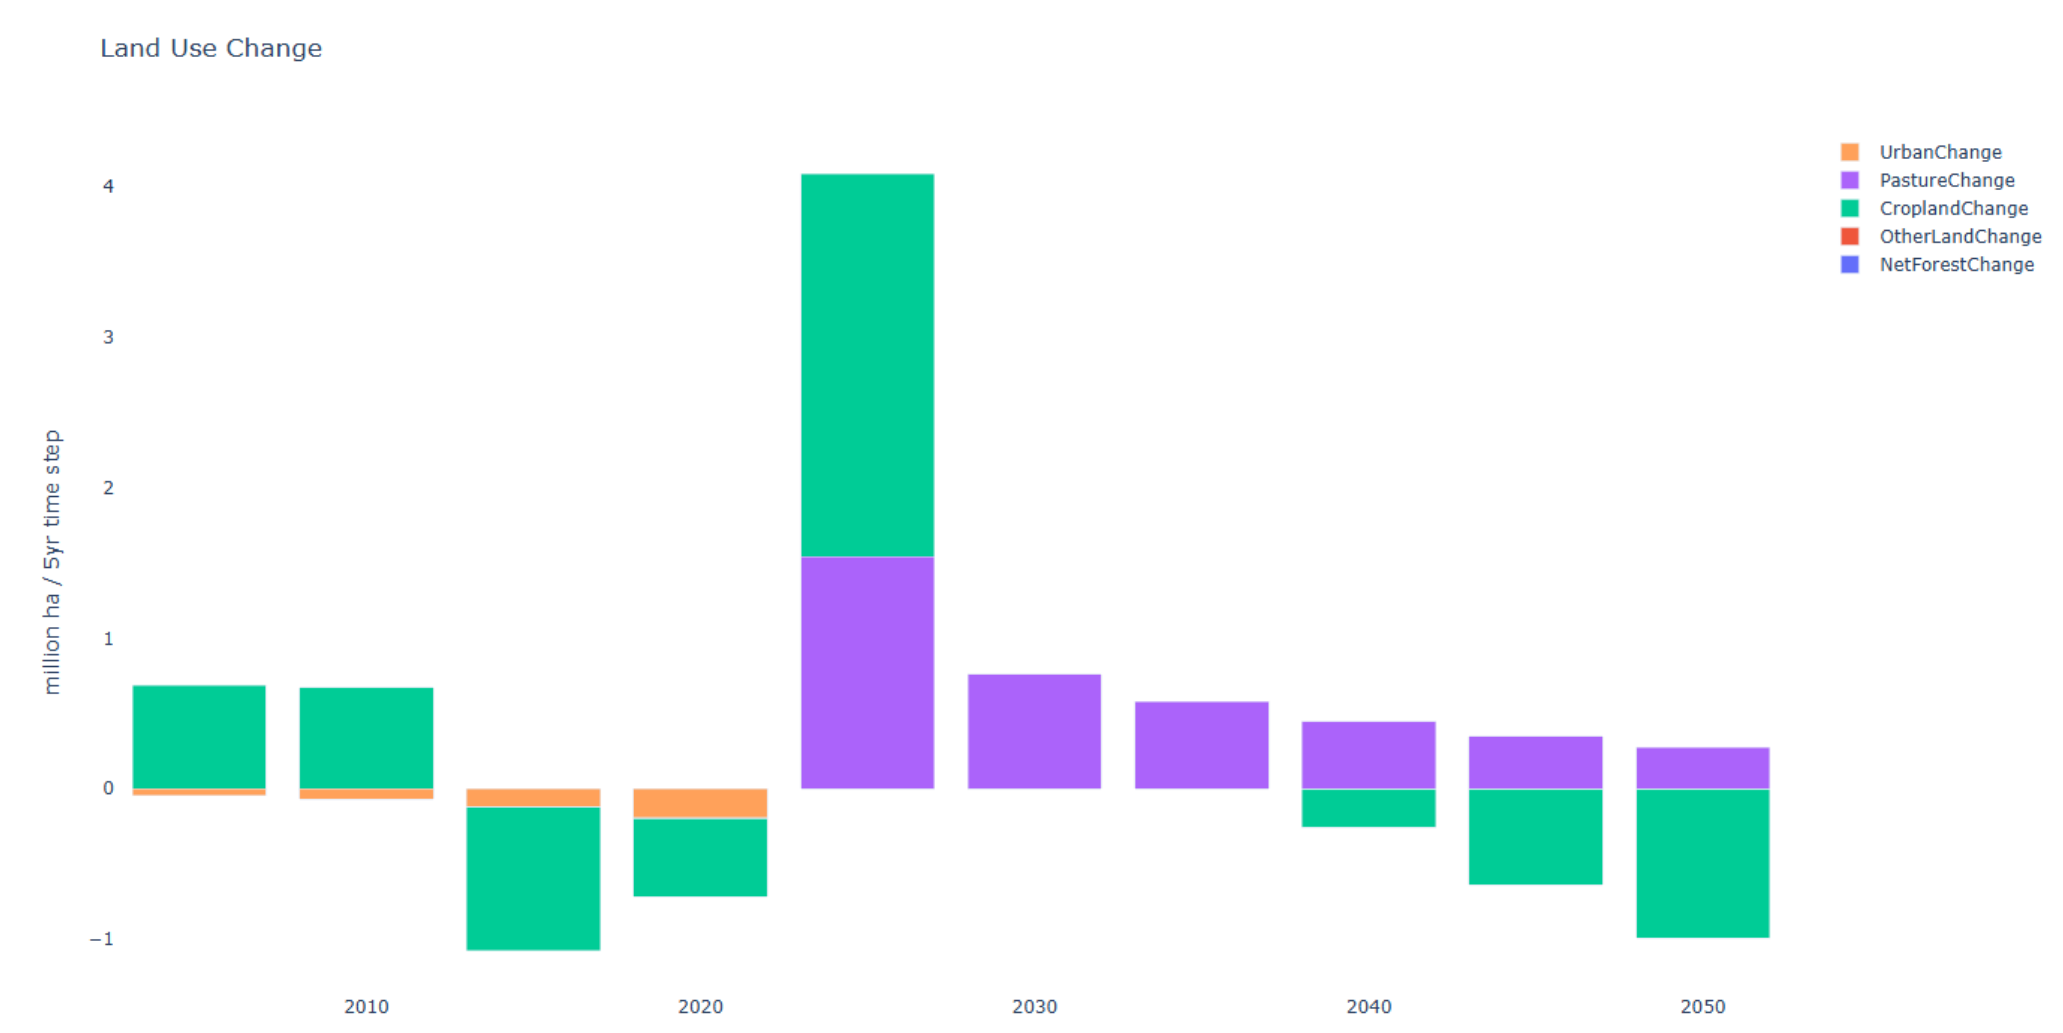

Area by land cover

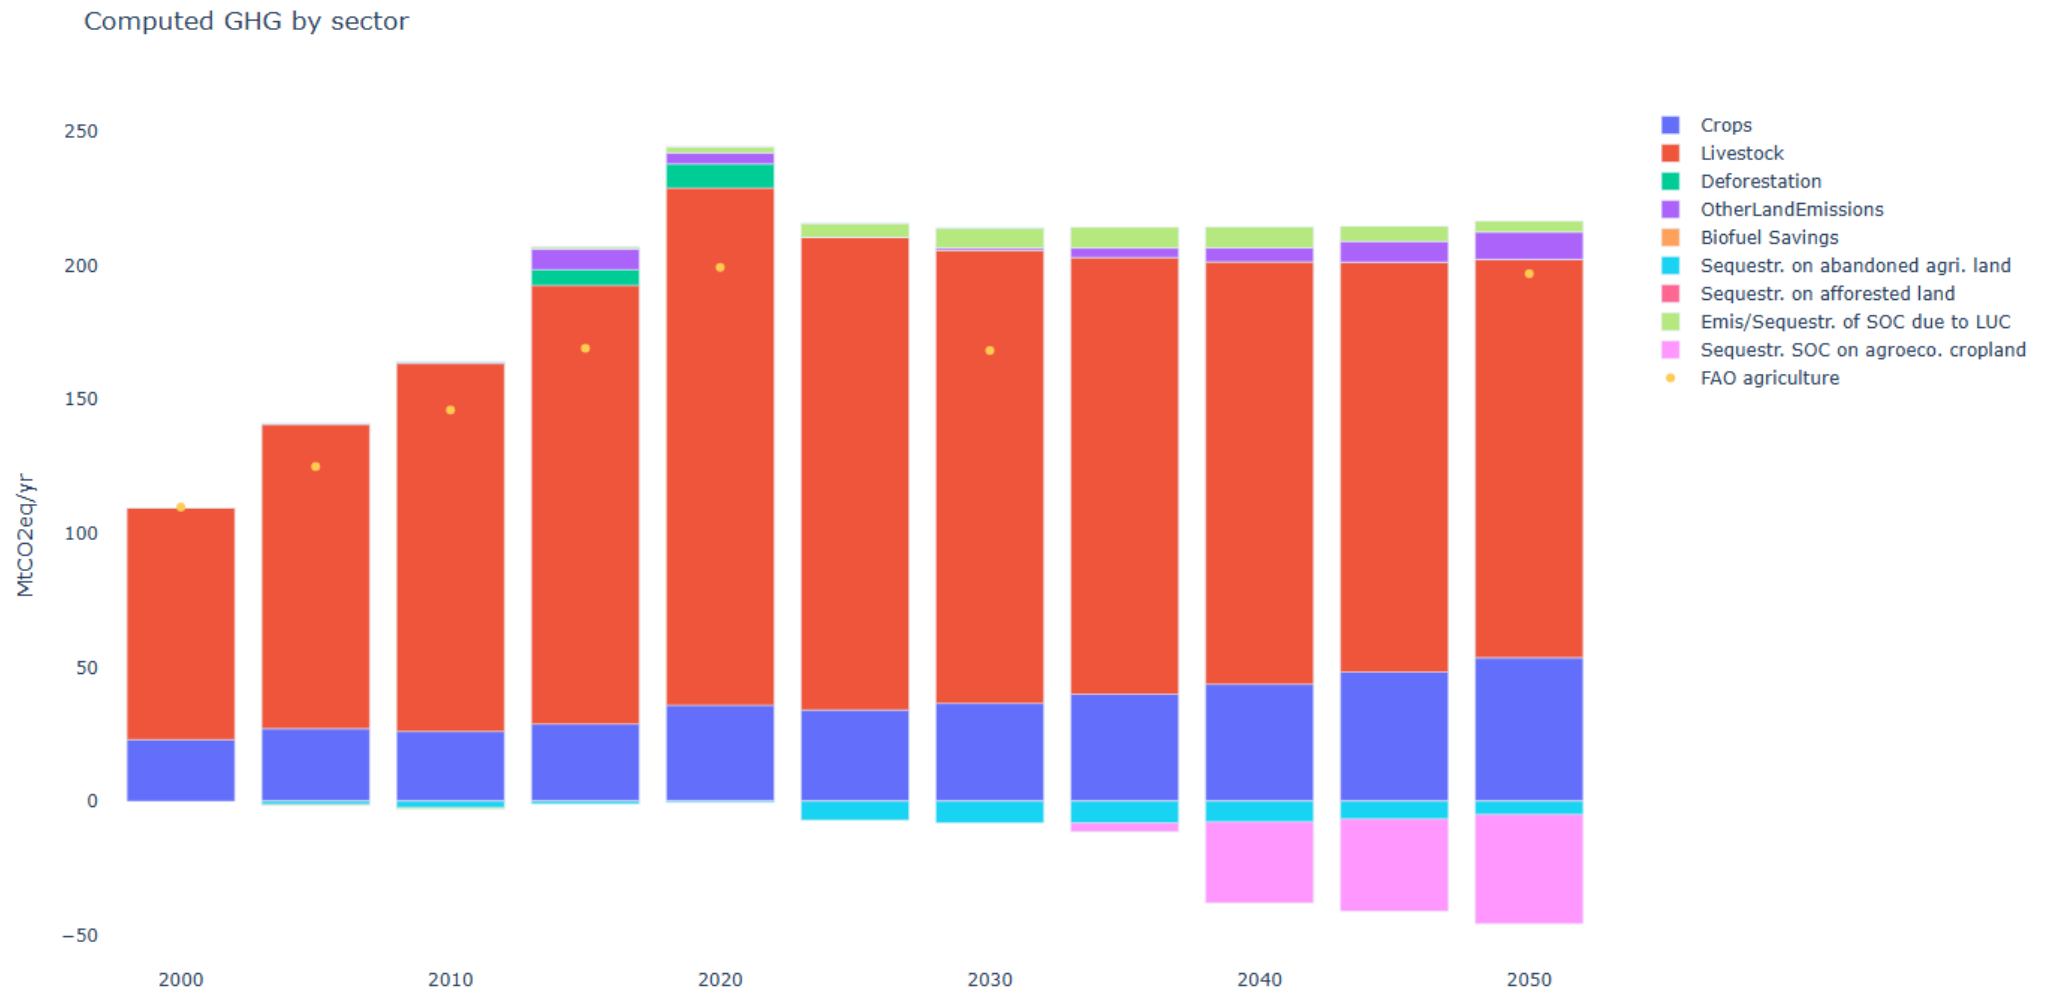

Forest Cover Change

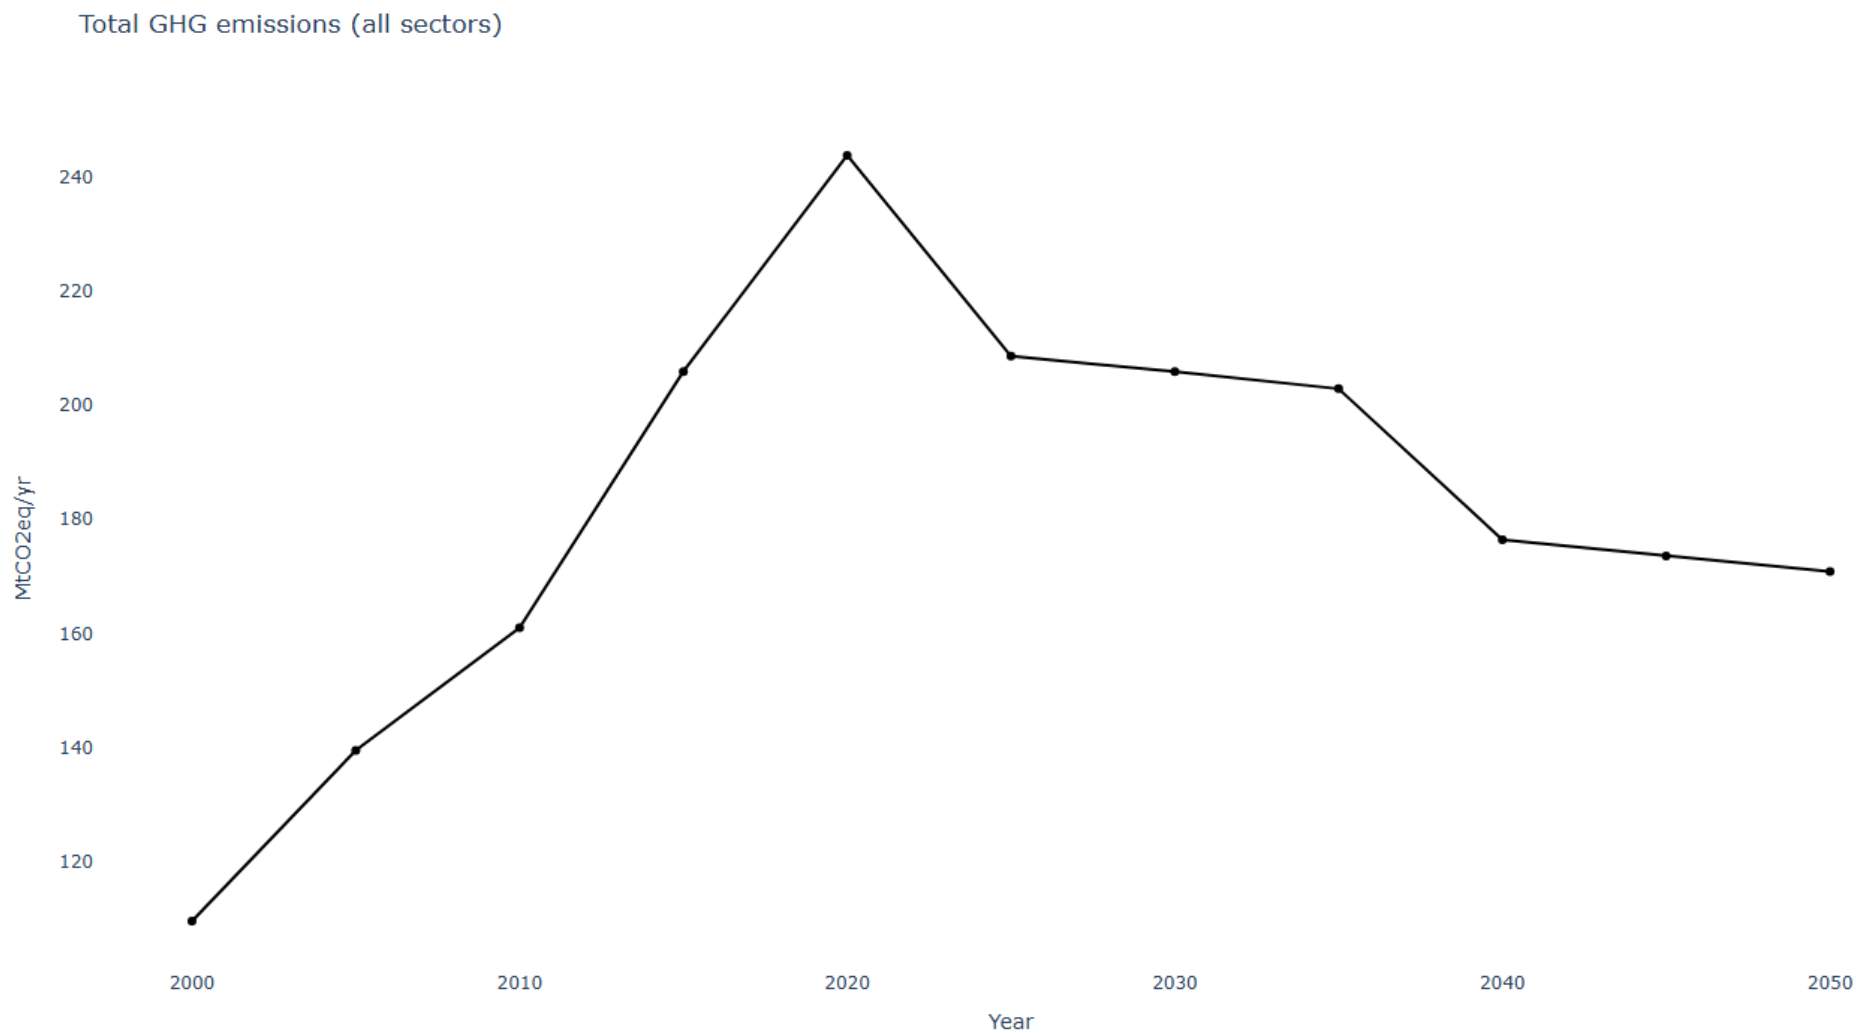

Land Use Change

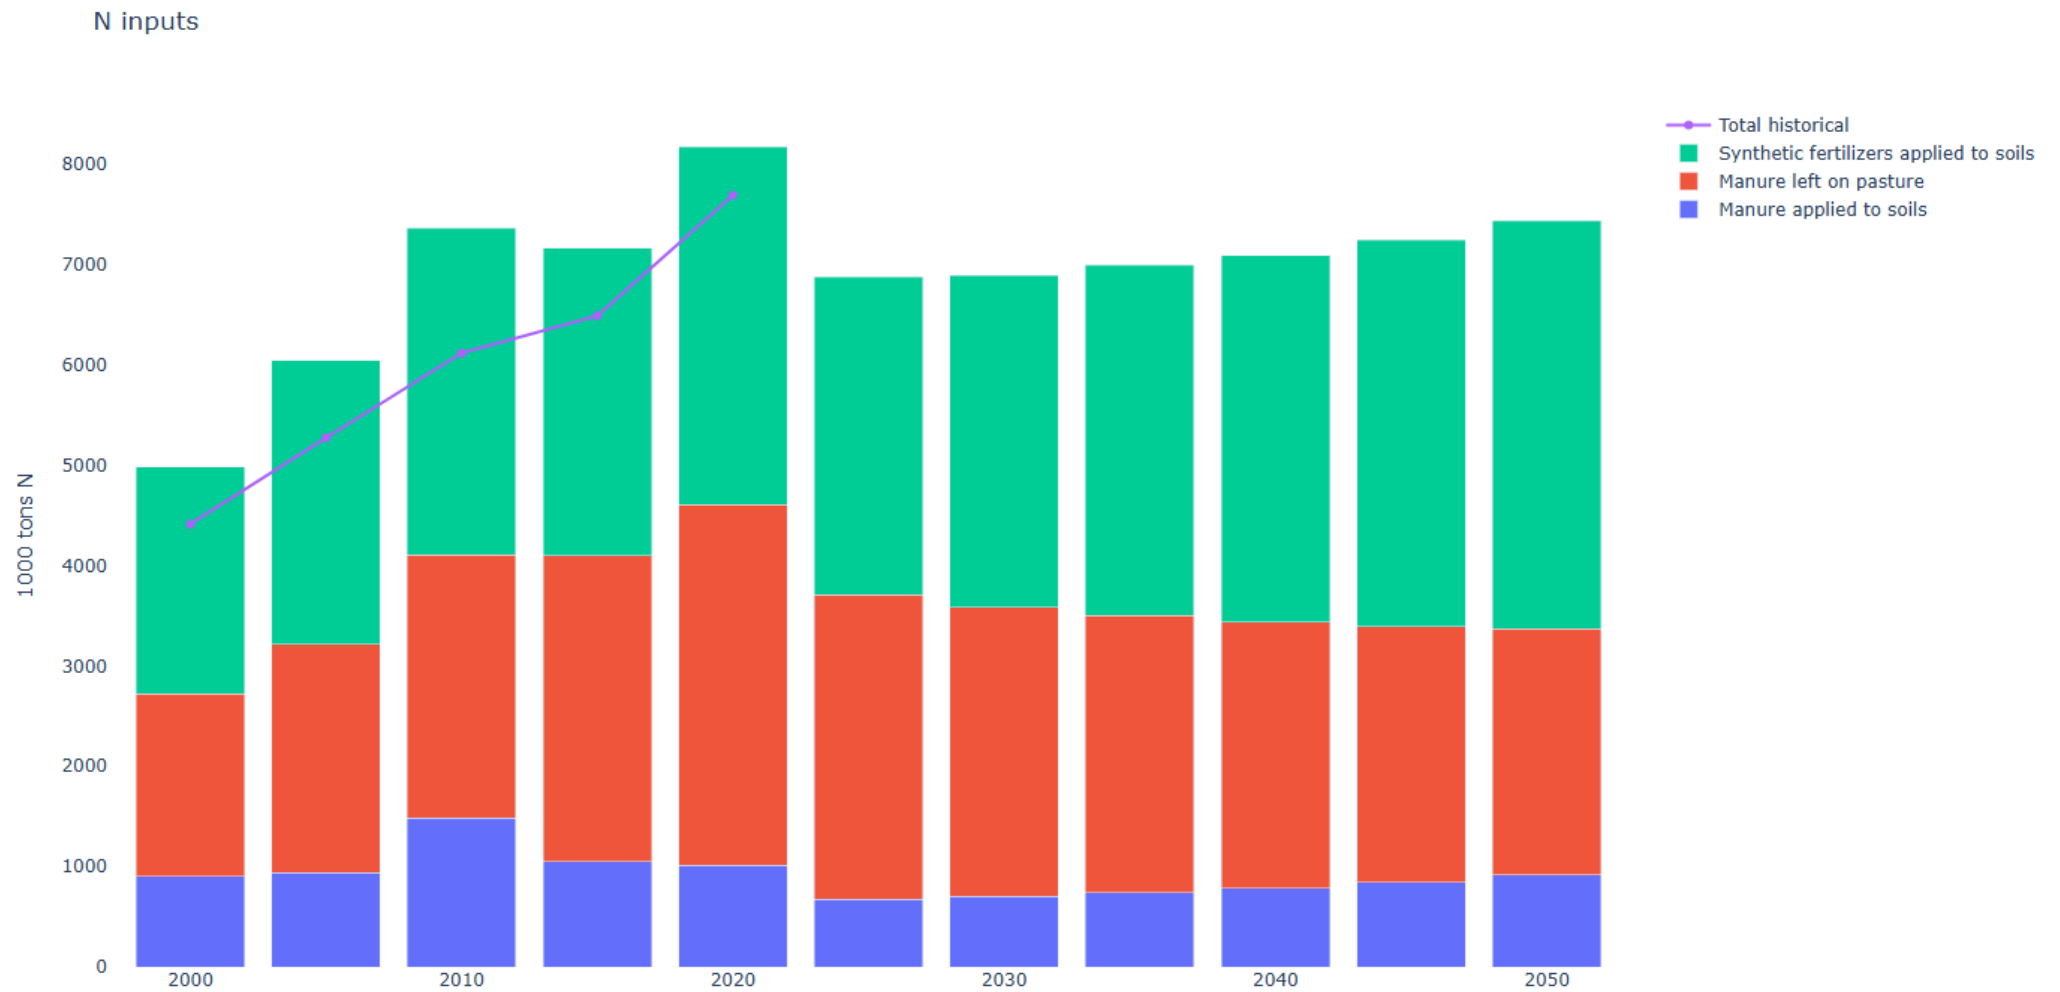

Computed GHG by sector

Total GHG emissions (all sectors)

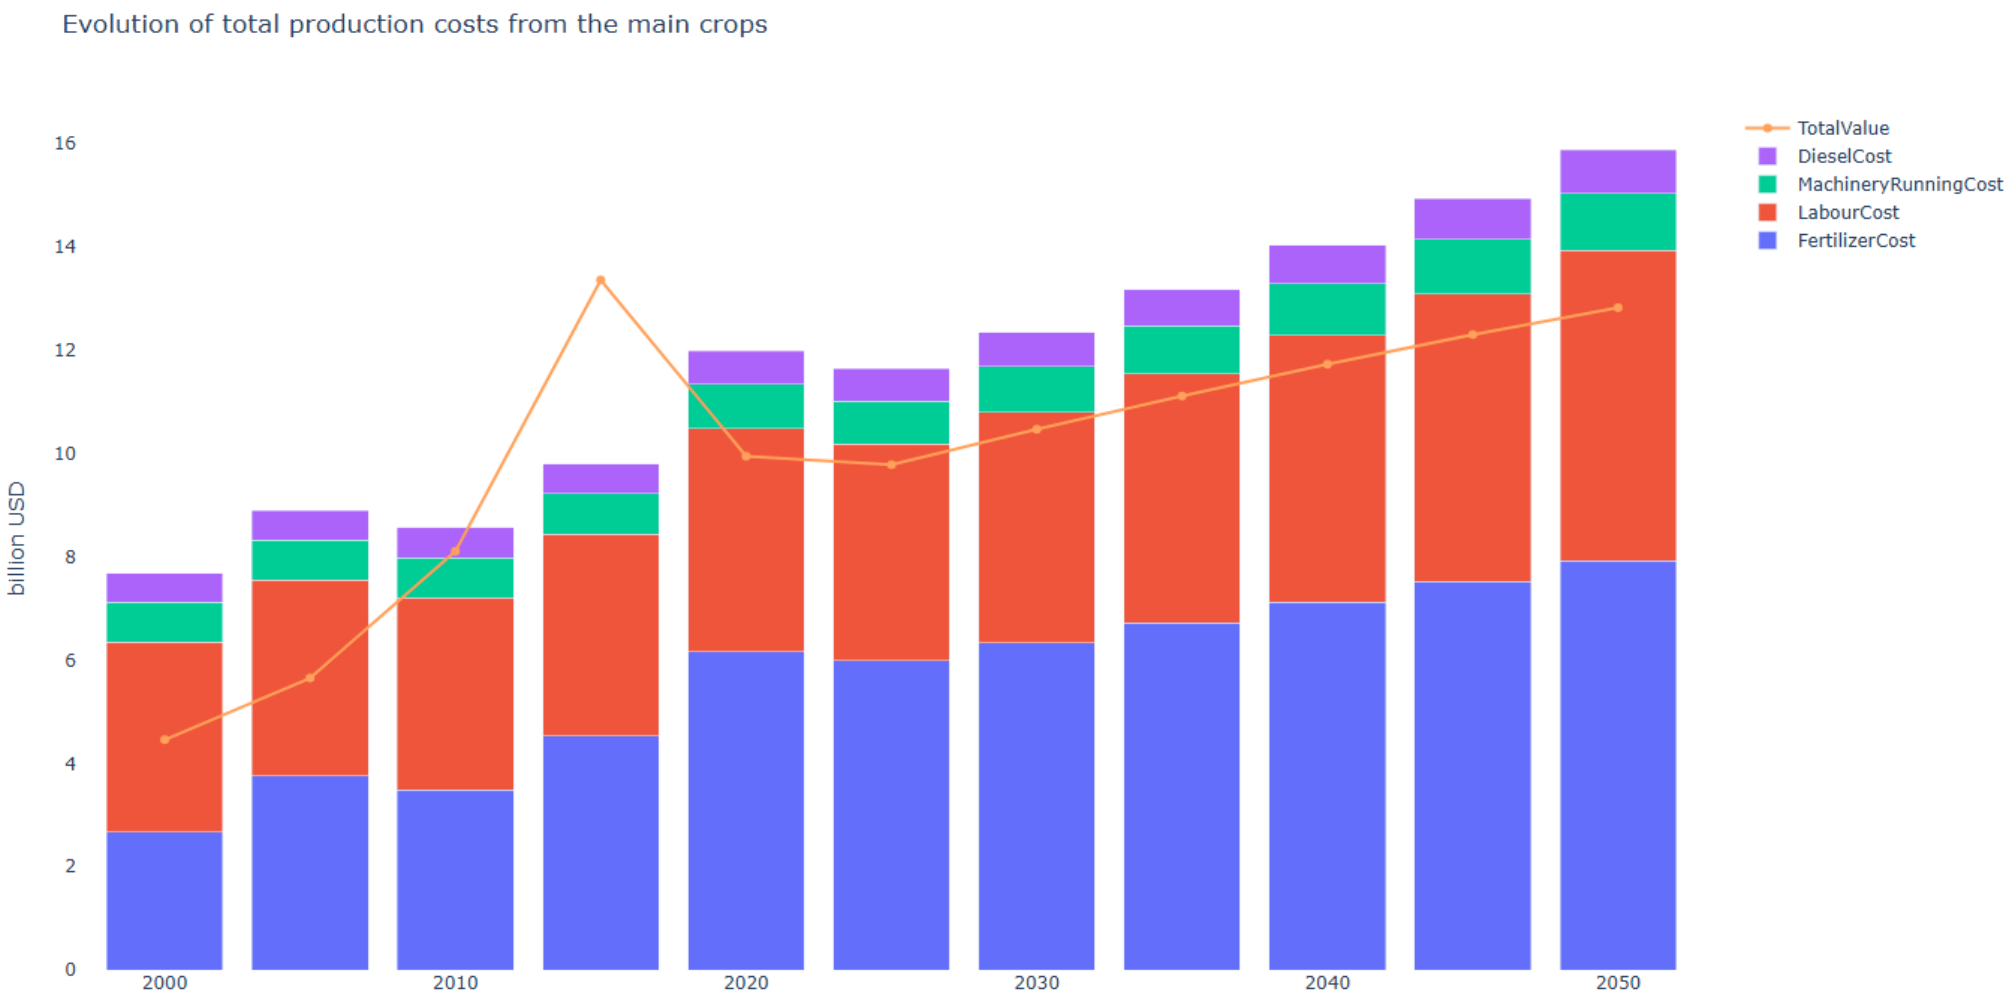

N inputs

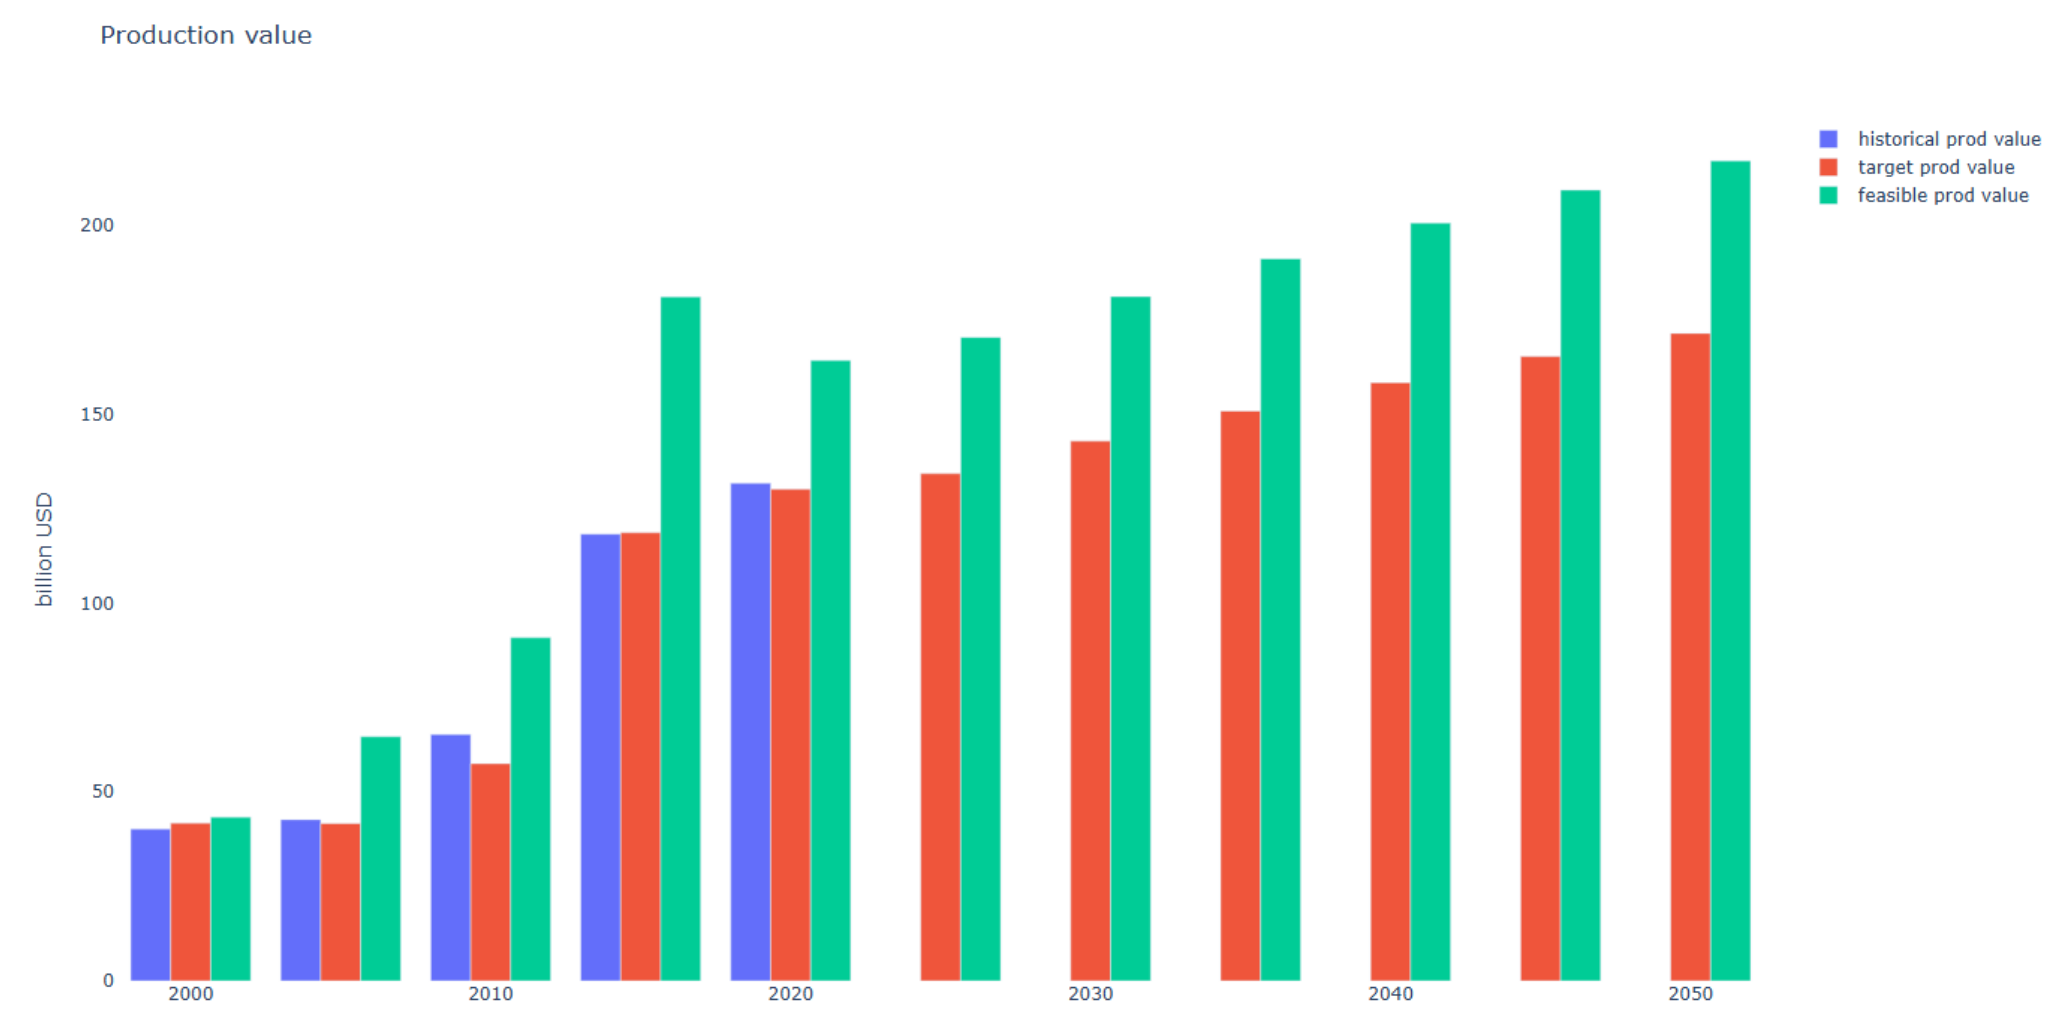

Scenario: Current Trends

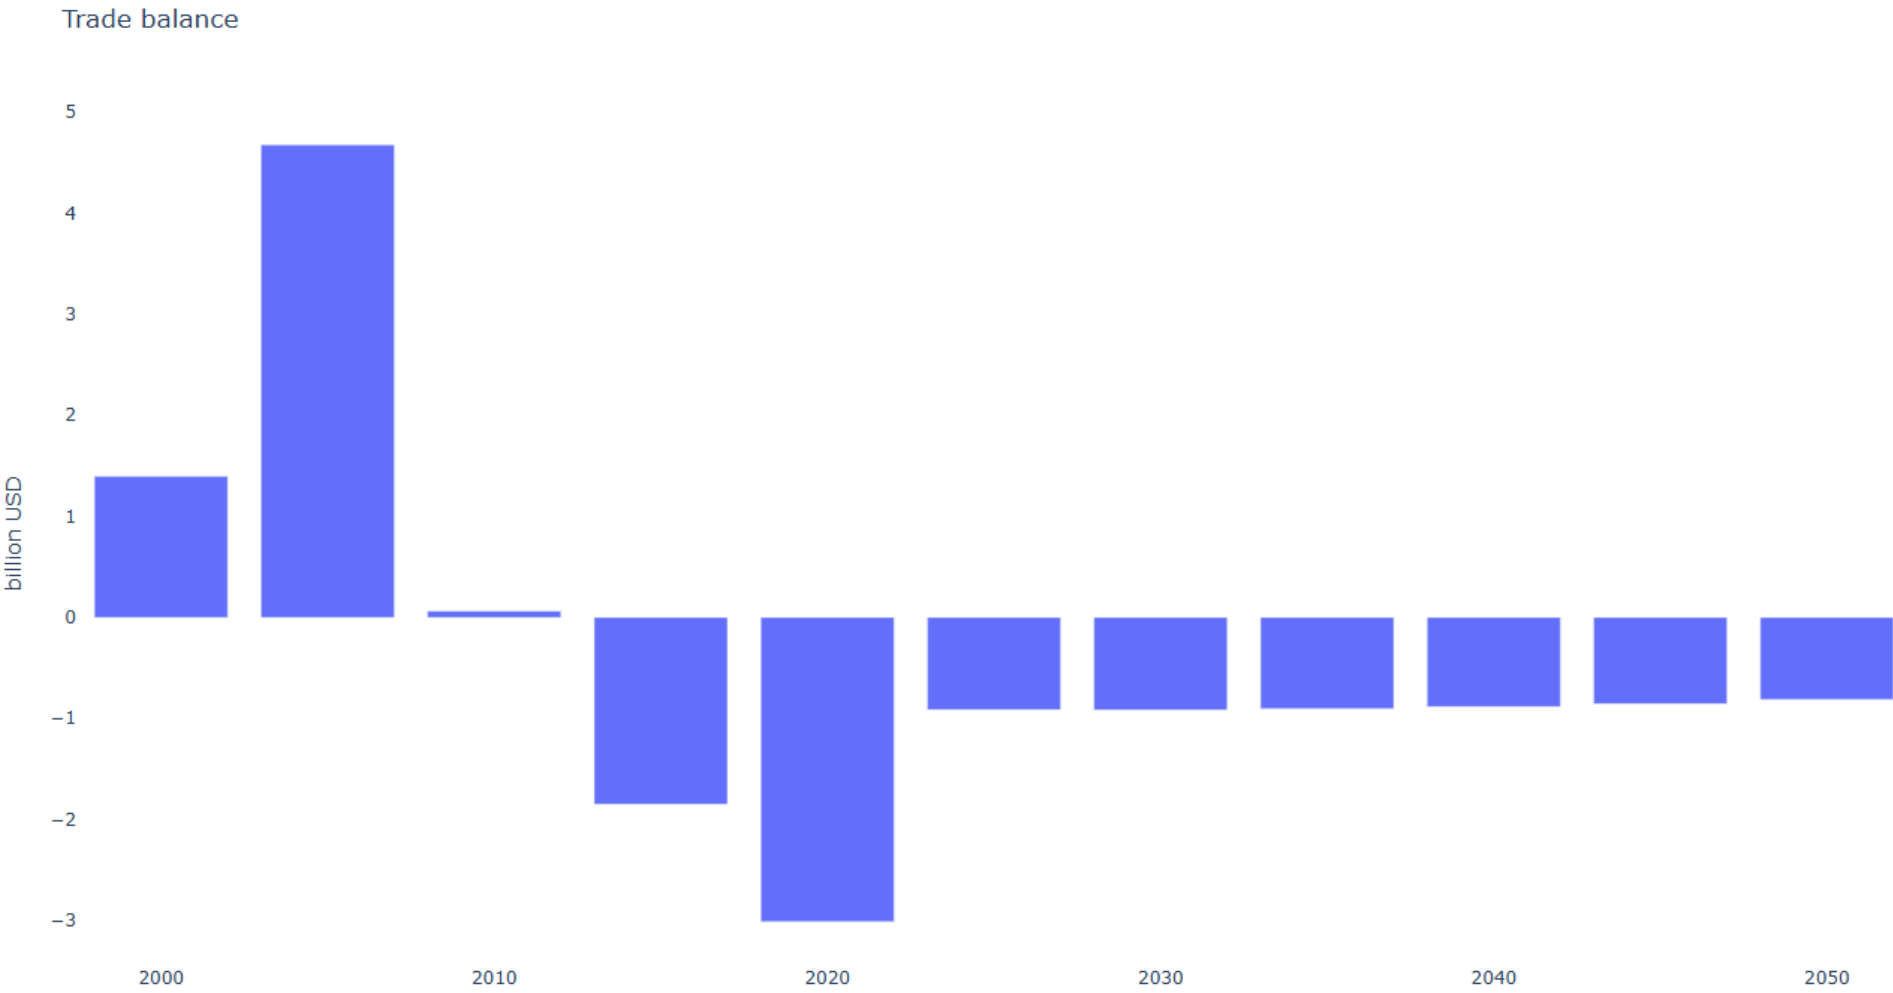

Evolution of total production costs from the main crops

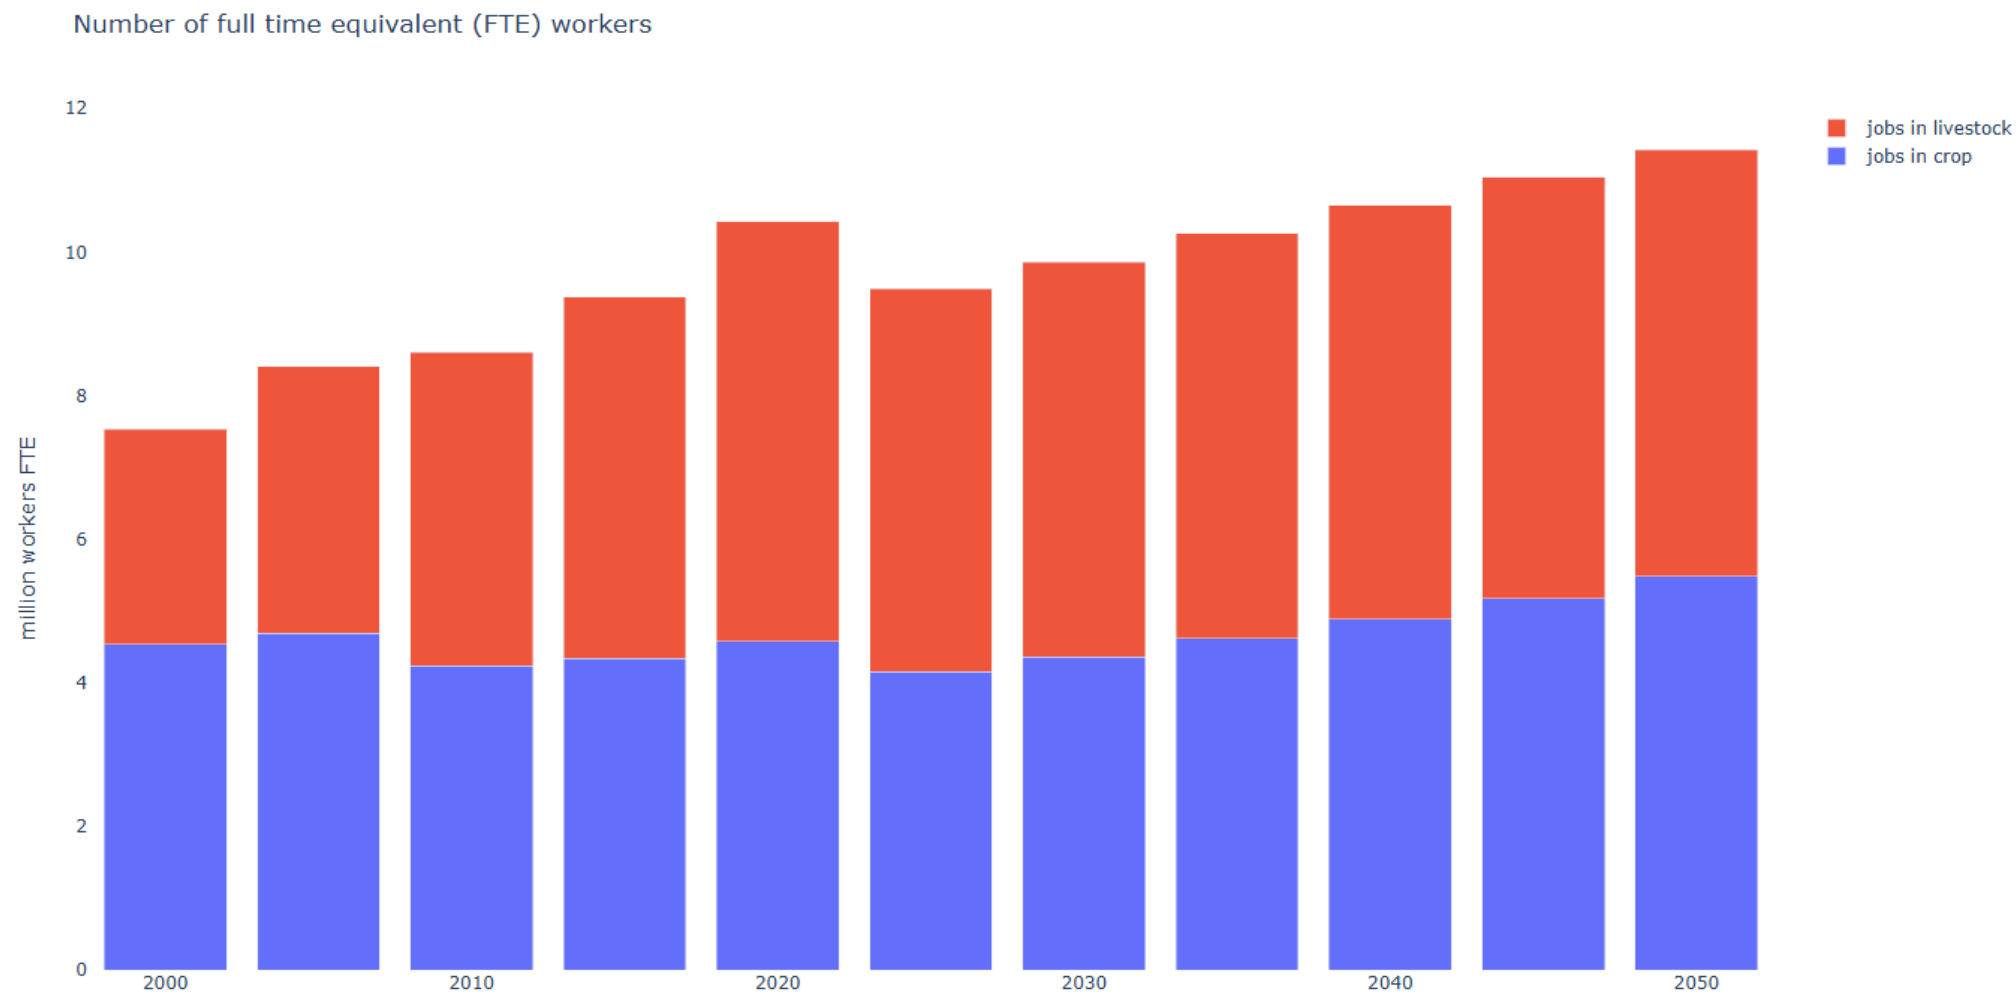

Production value

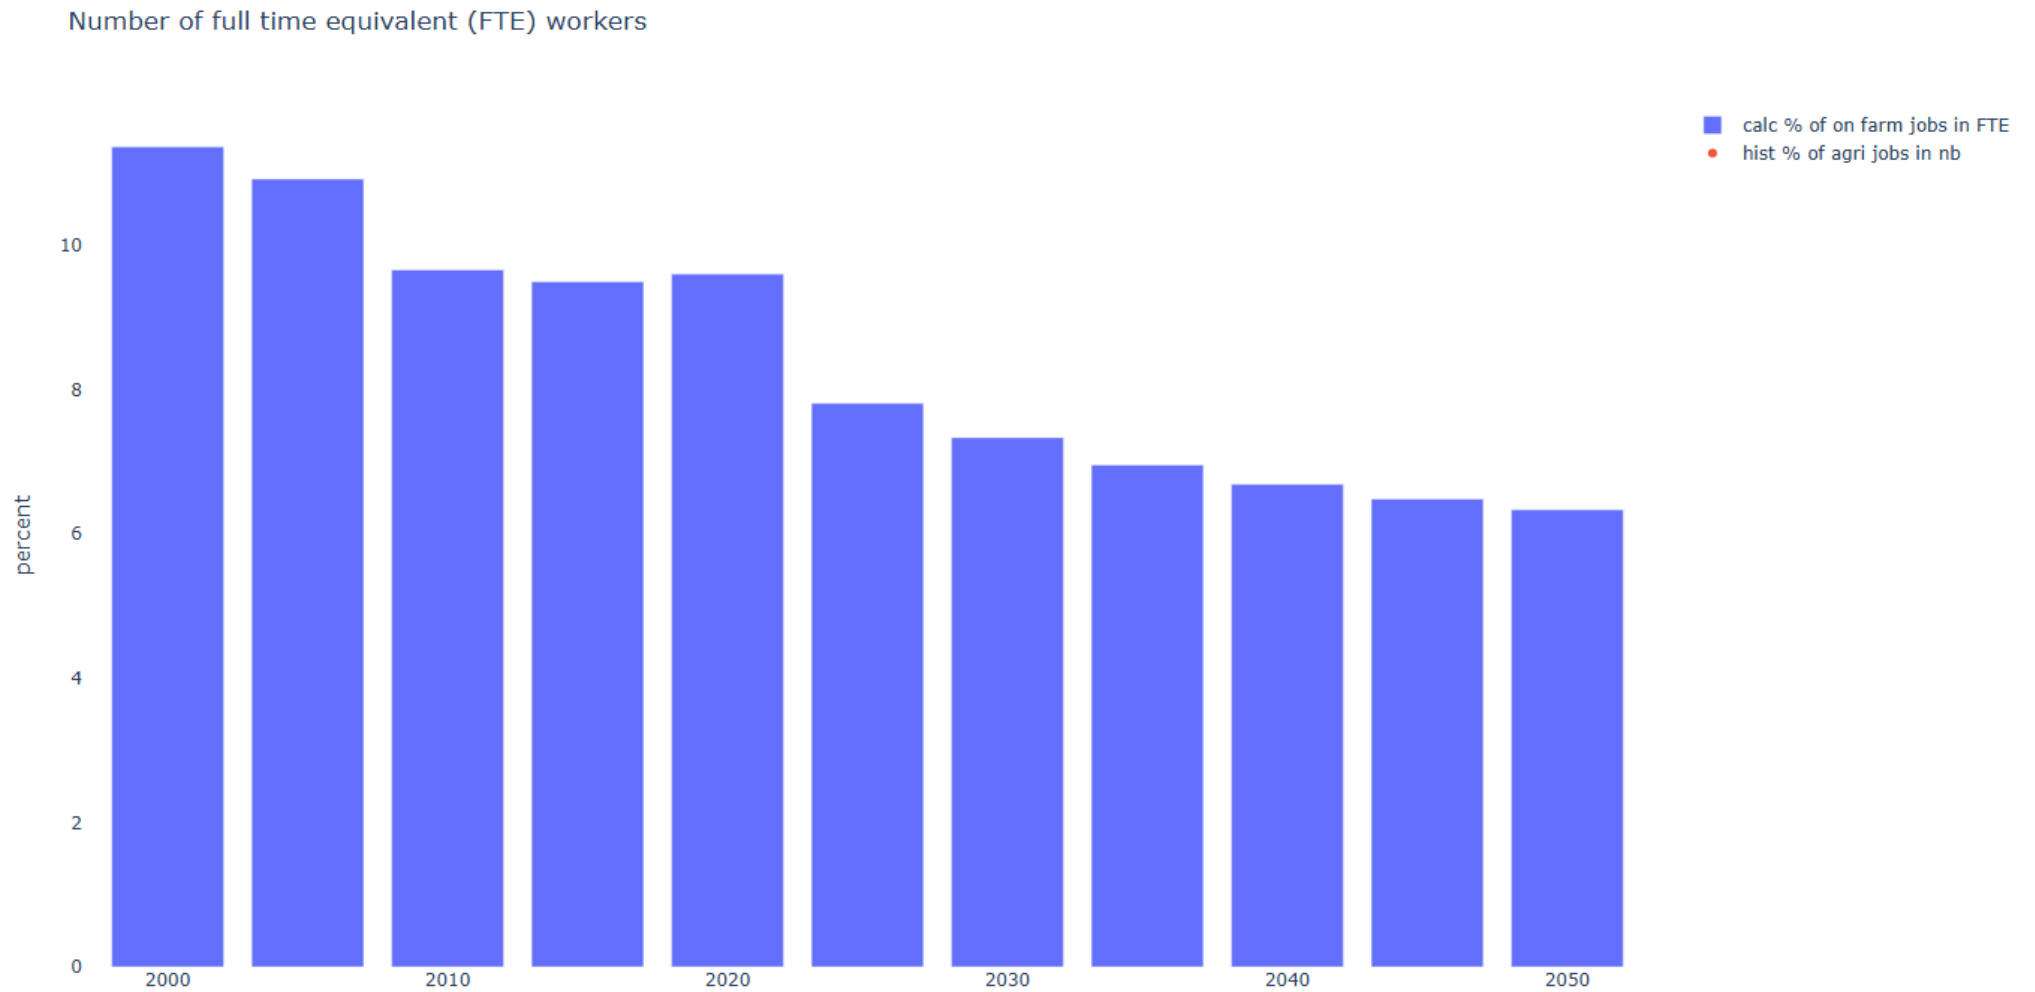

Trade balance

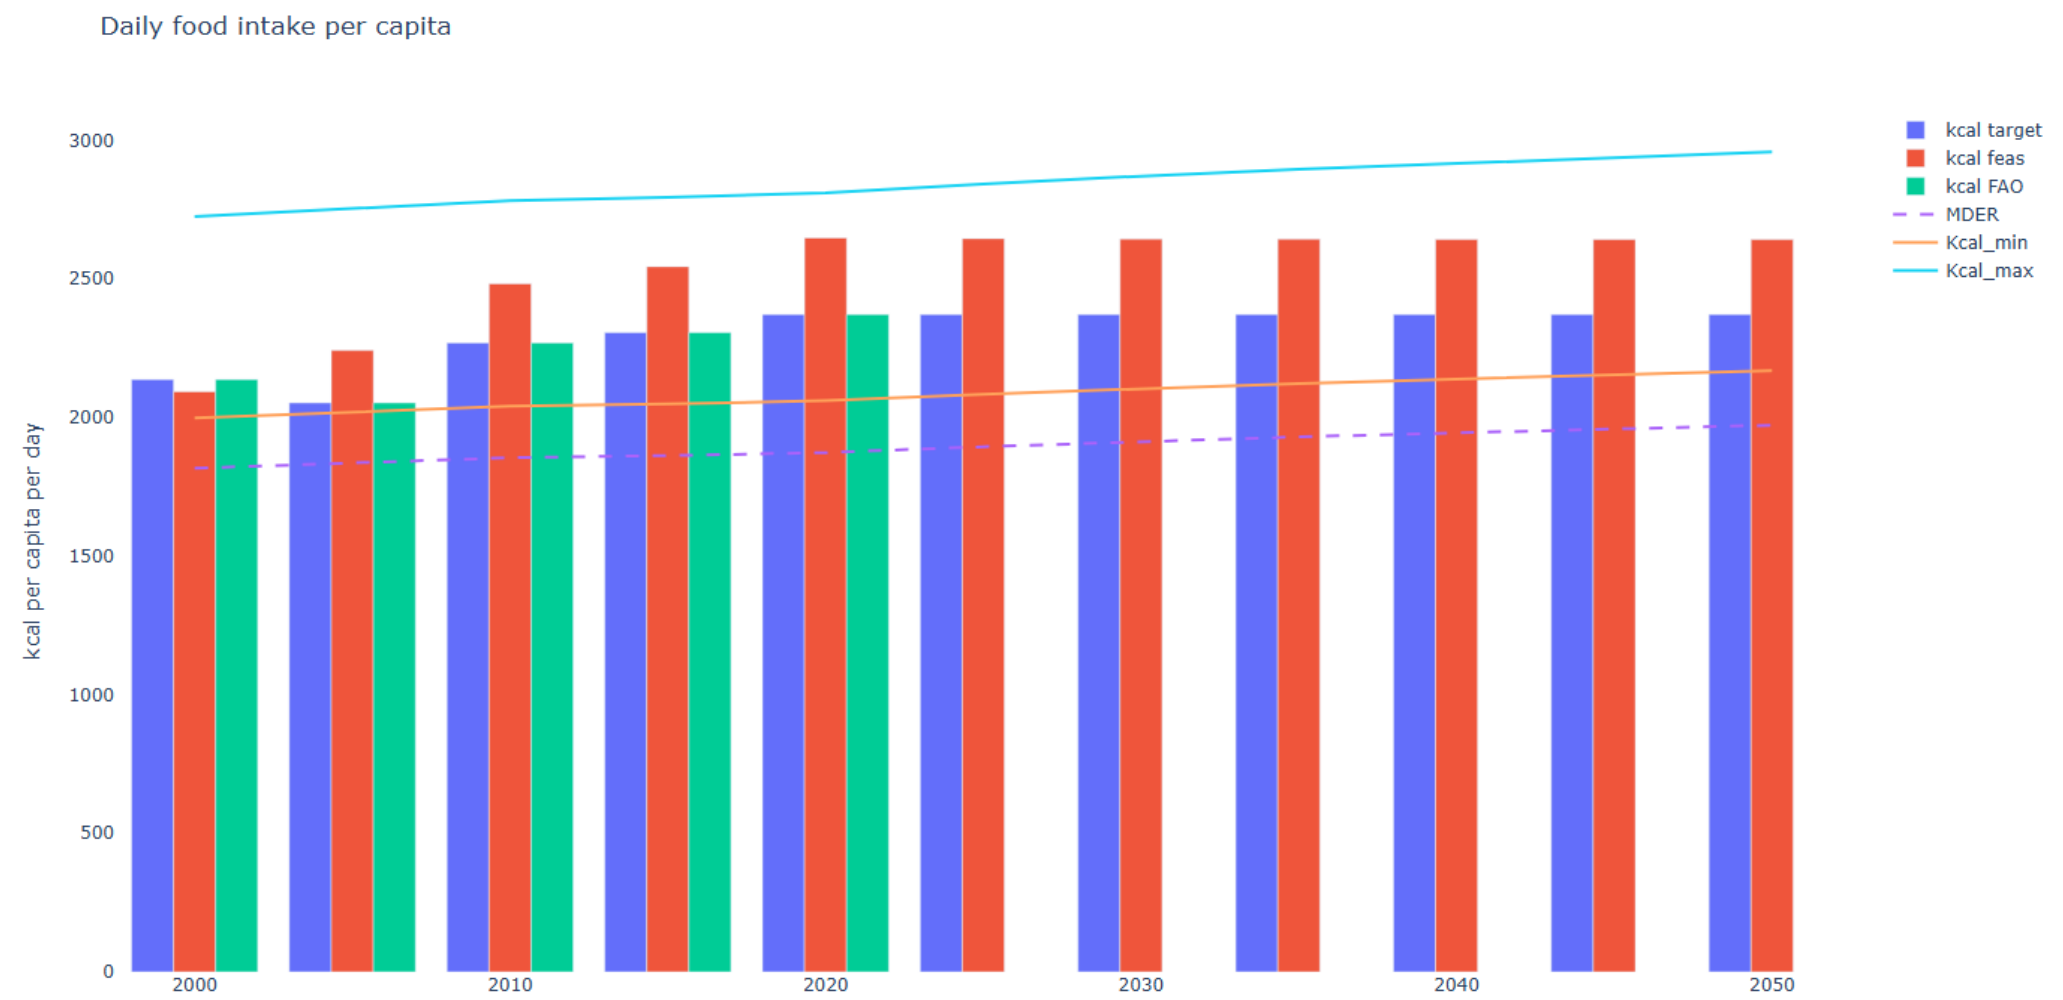

Number of full time equivalent (FTE) workers

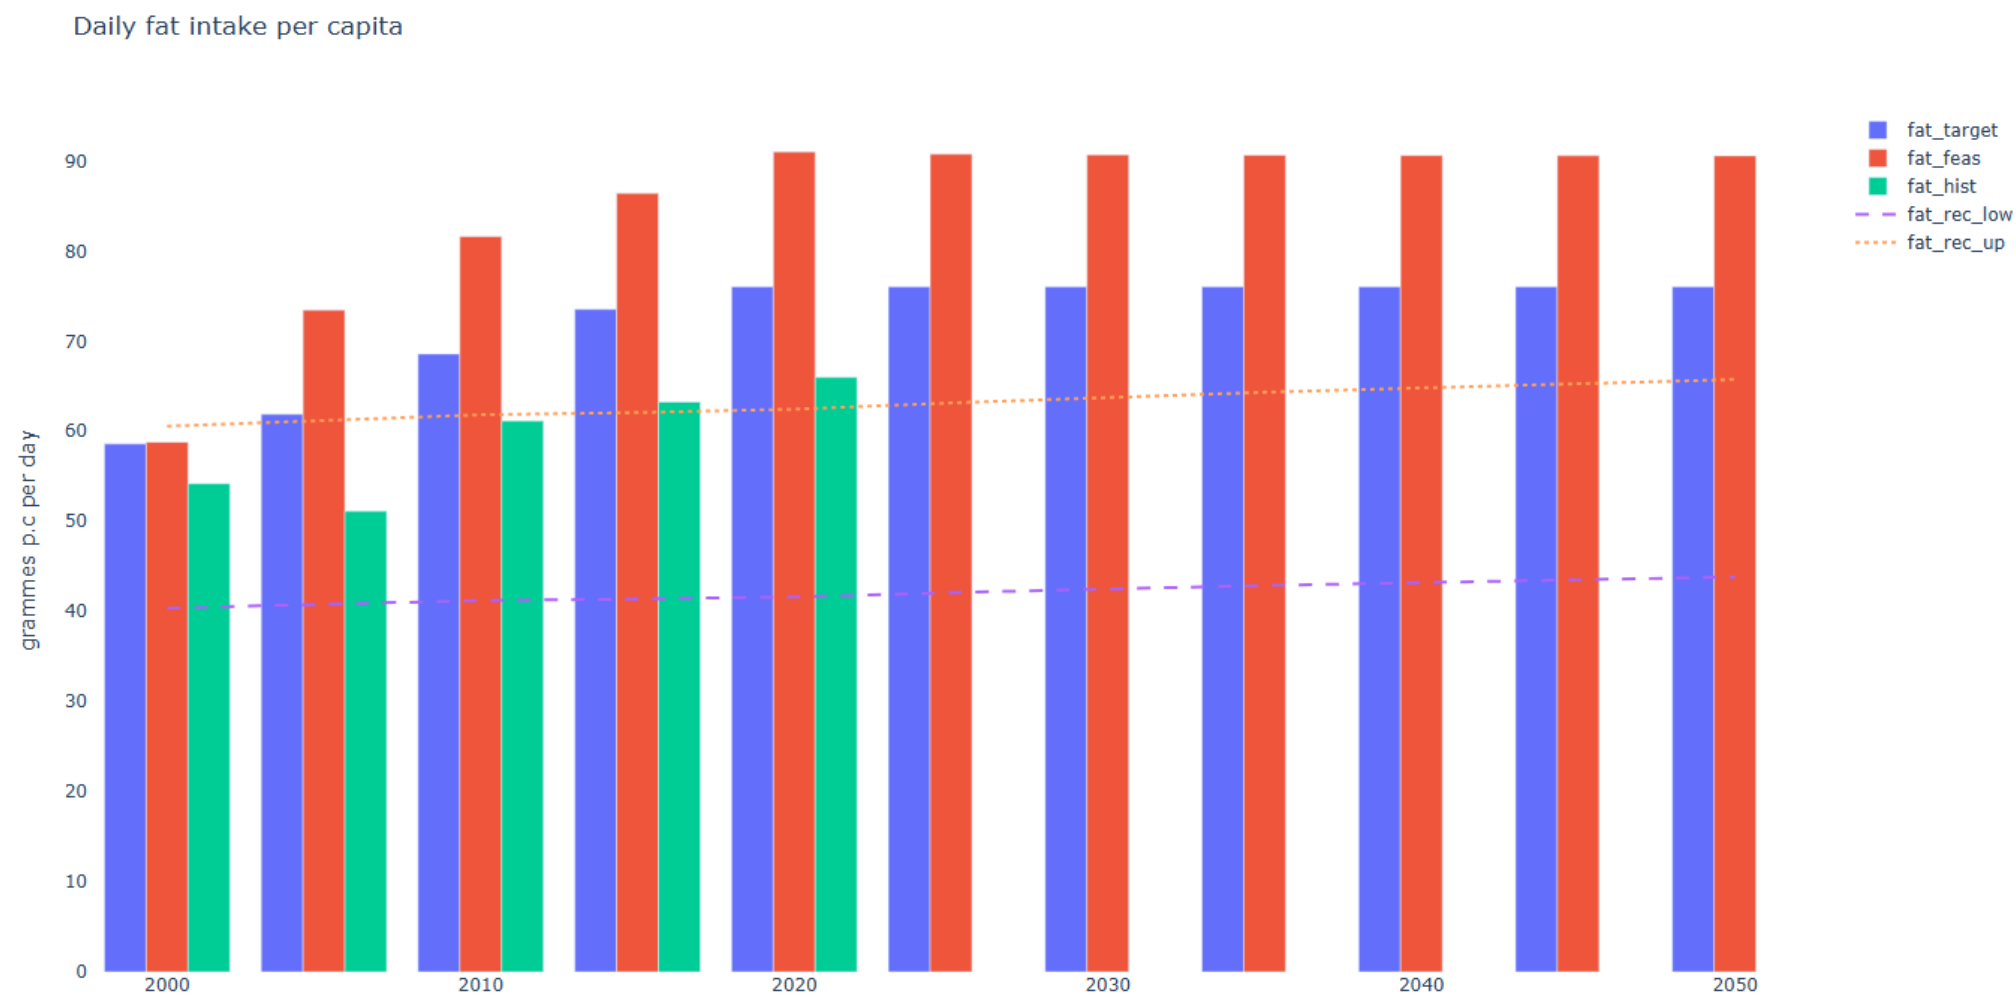

Number of full time equivalent (FTE) workers

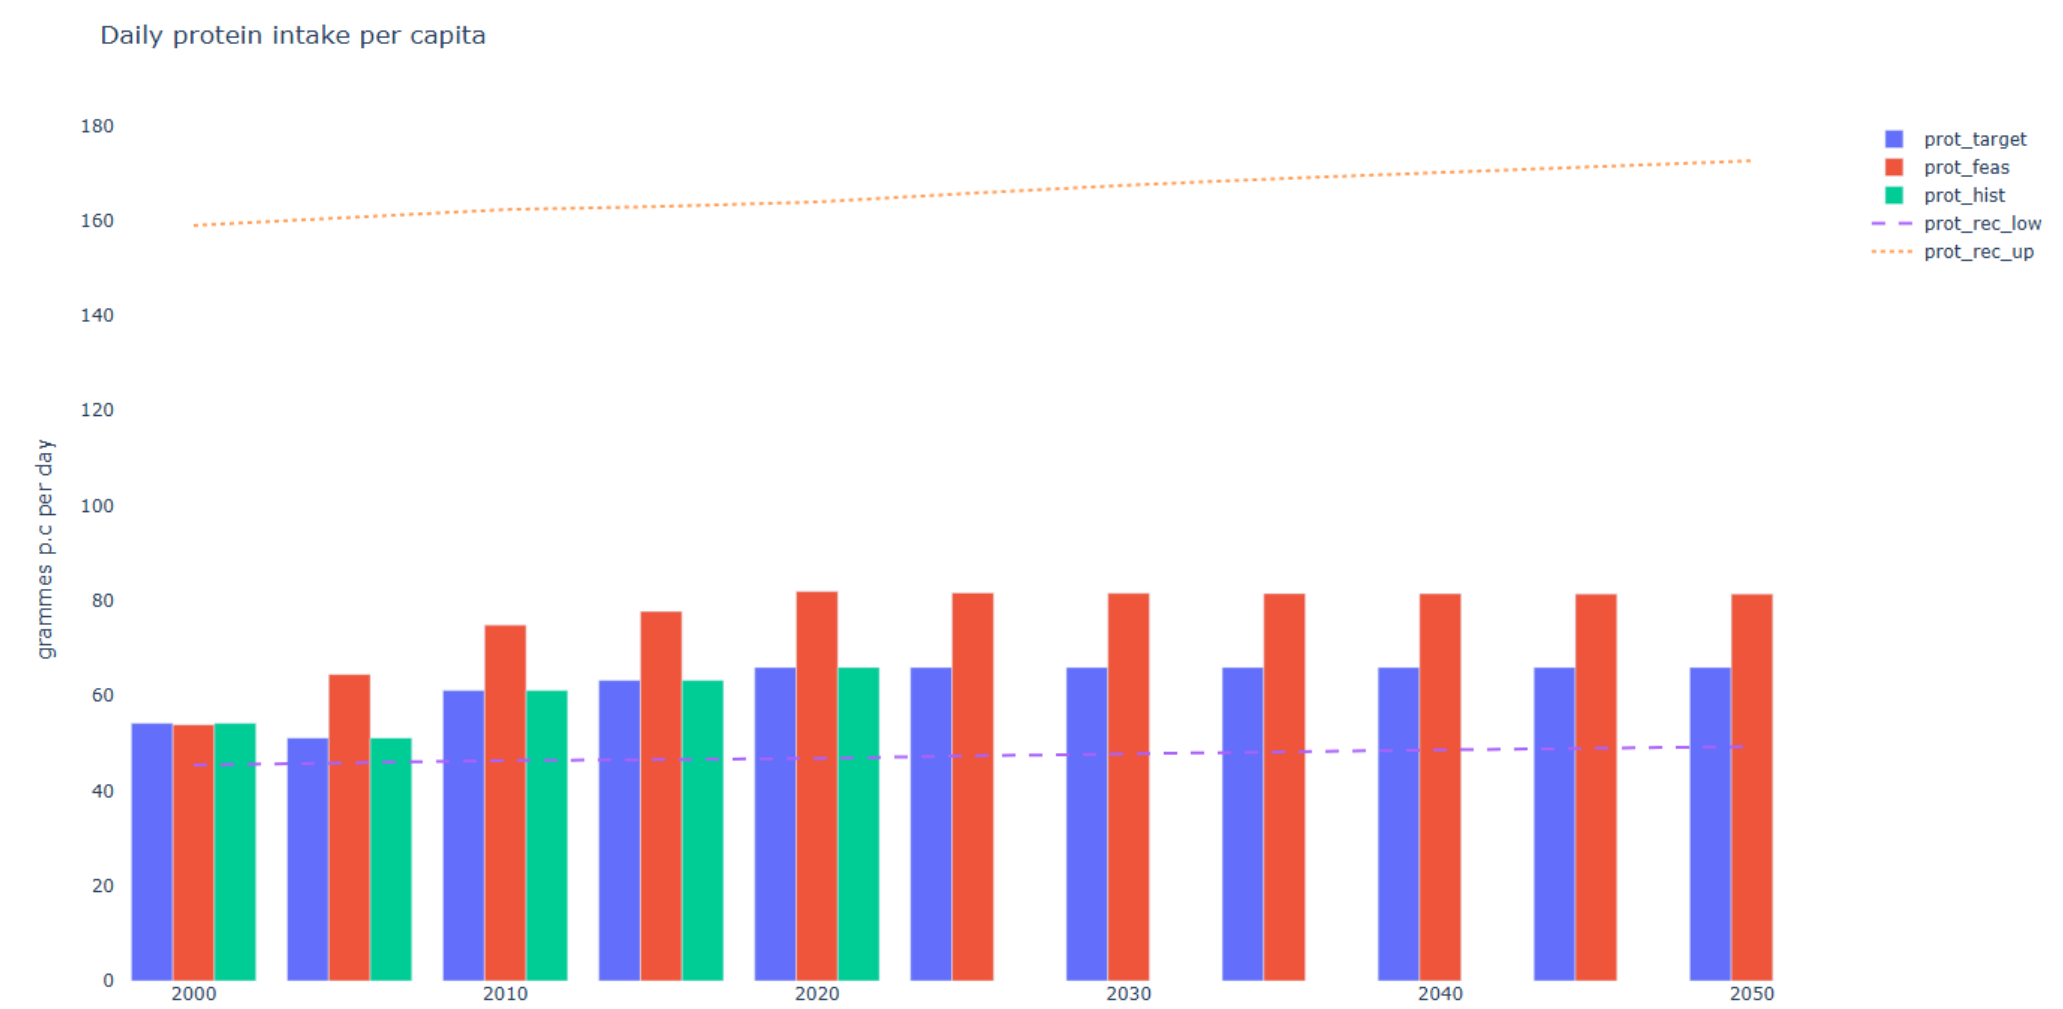

Daily food intake per capita

Daily fat intake per capita

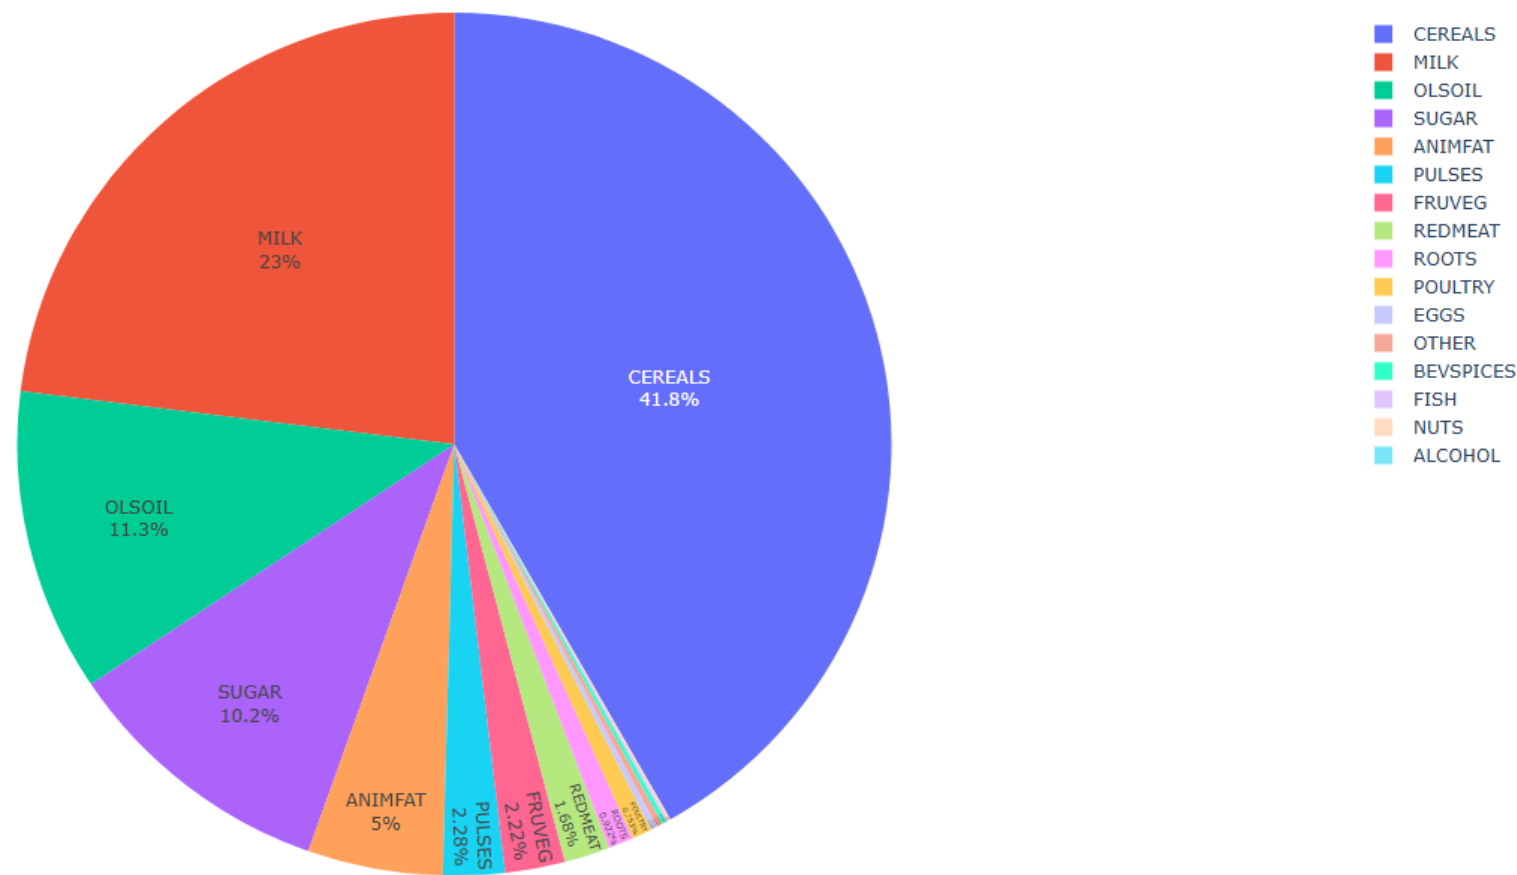

Daily protein intake per capita

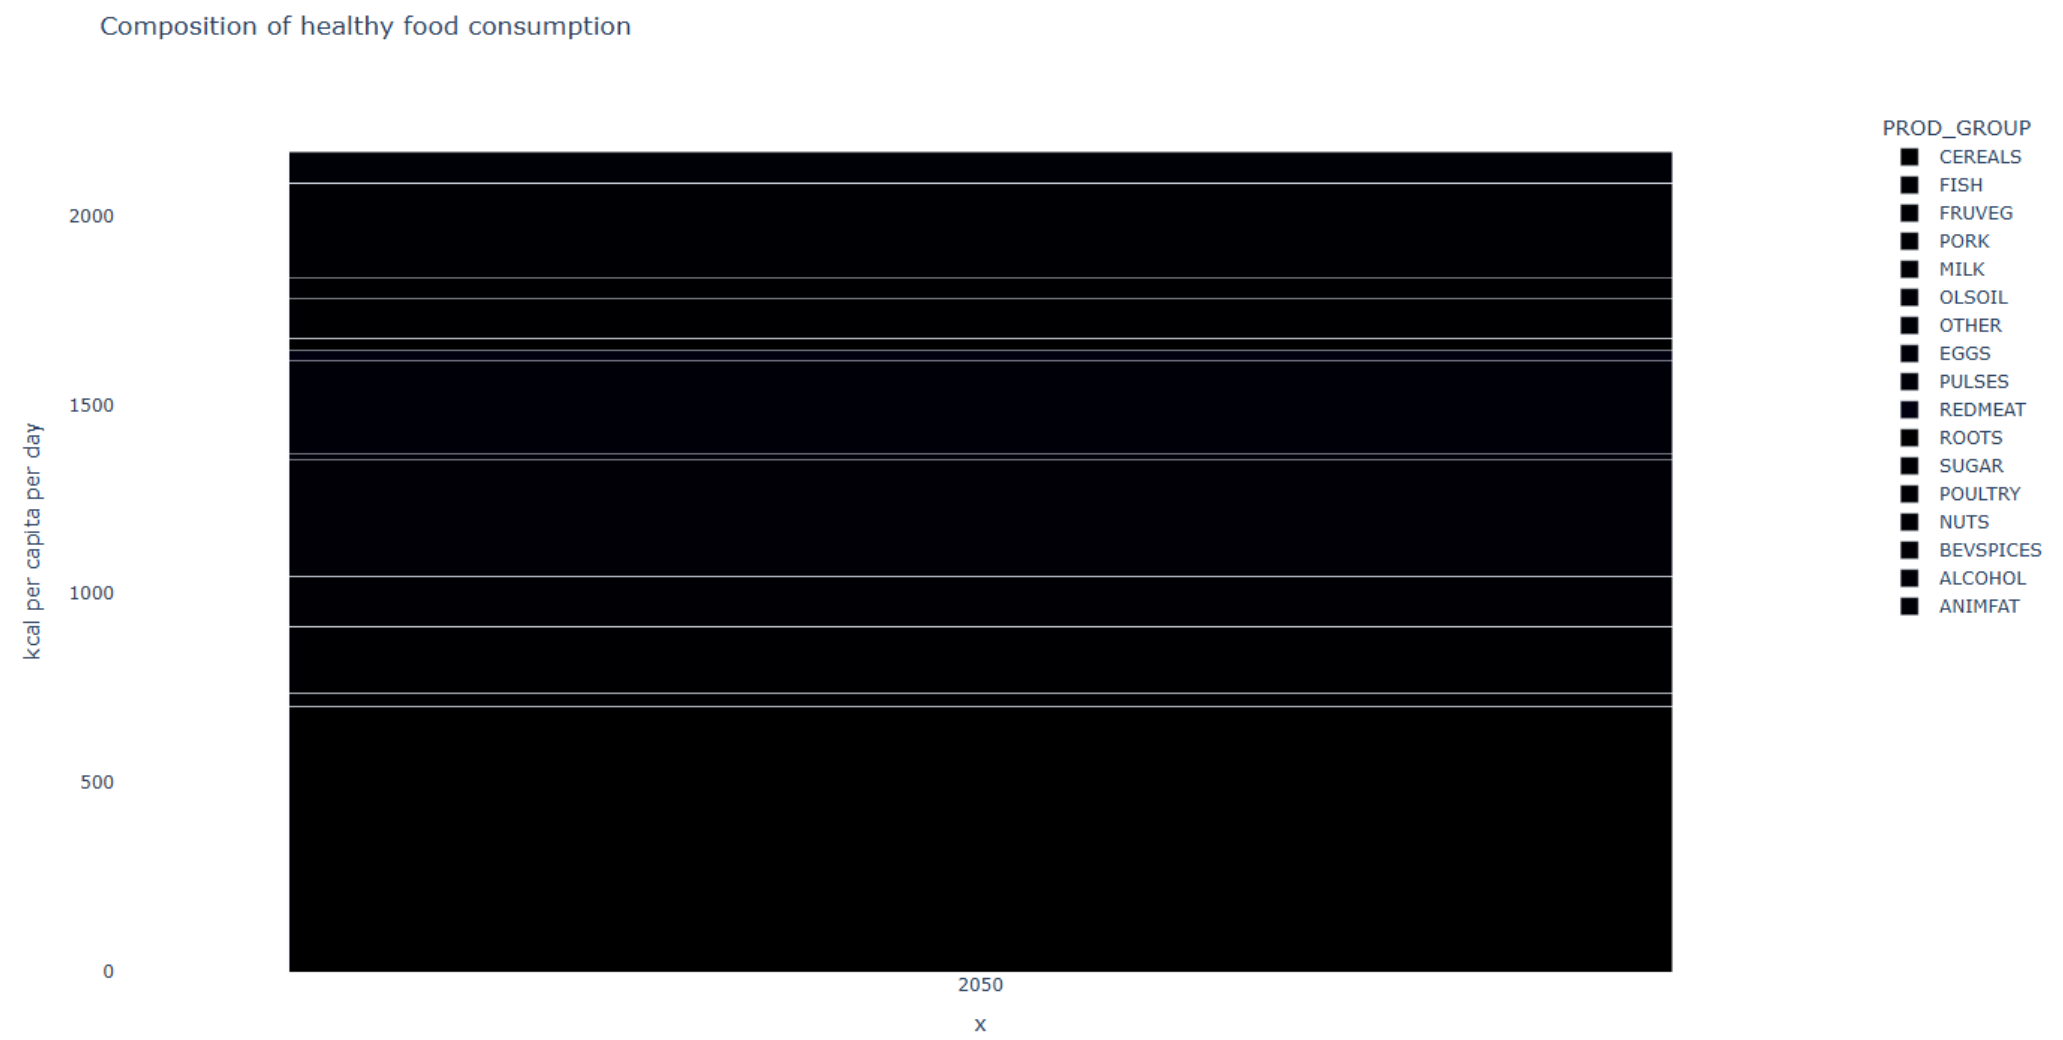

Diet mix (2050)

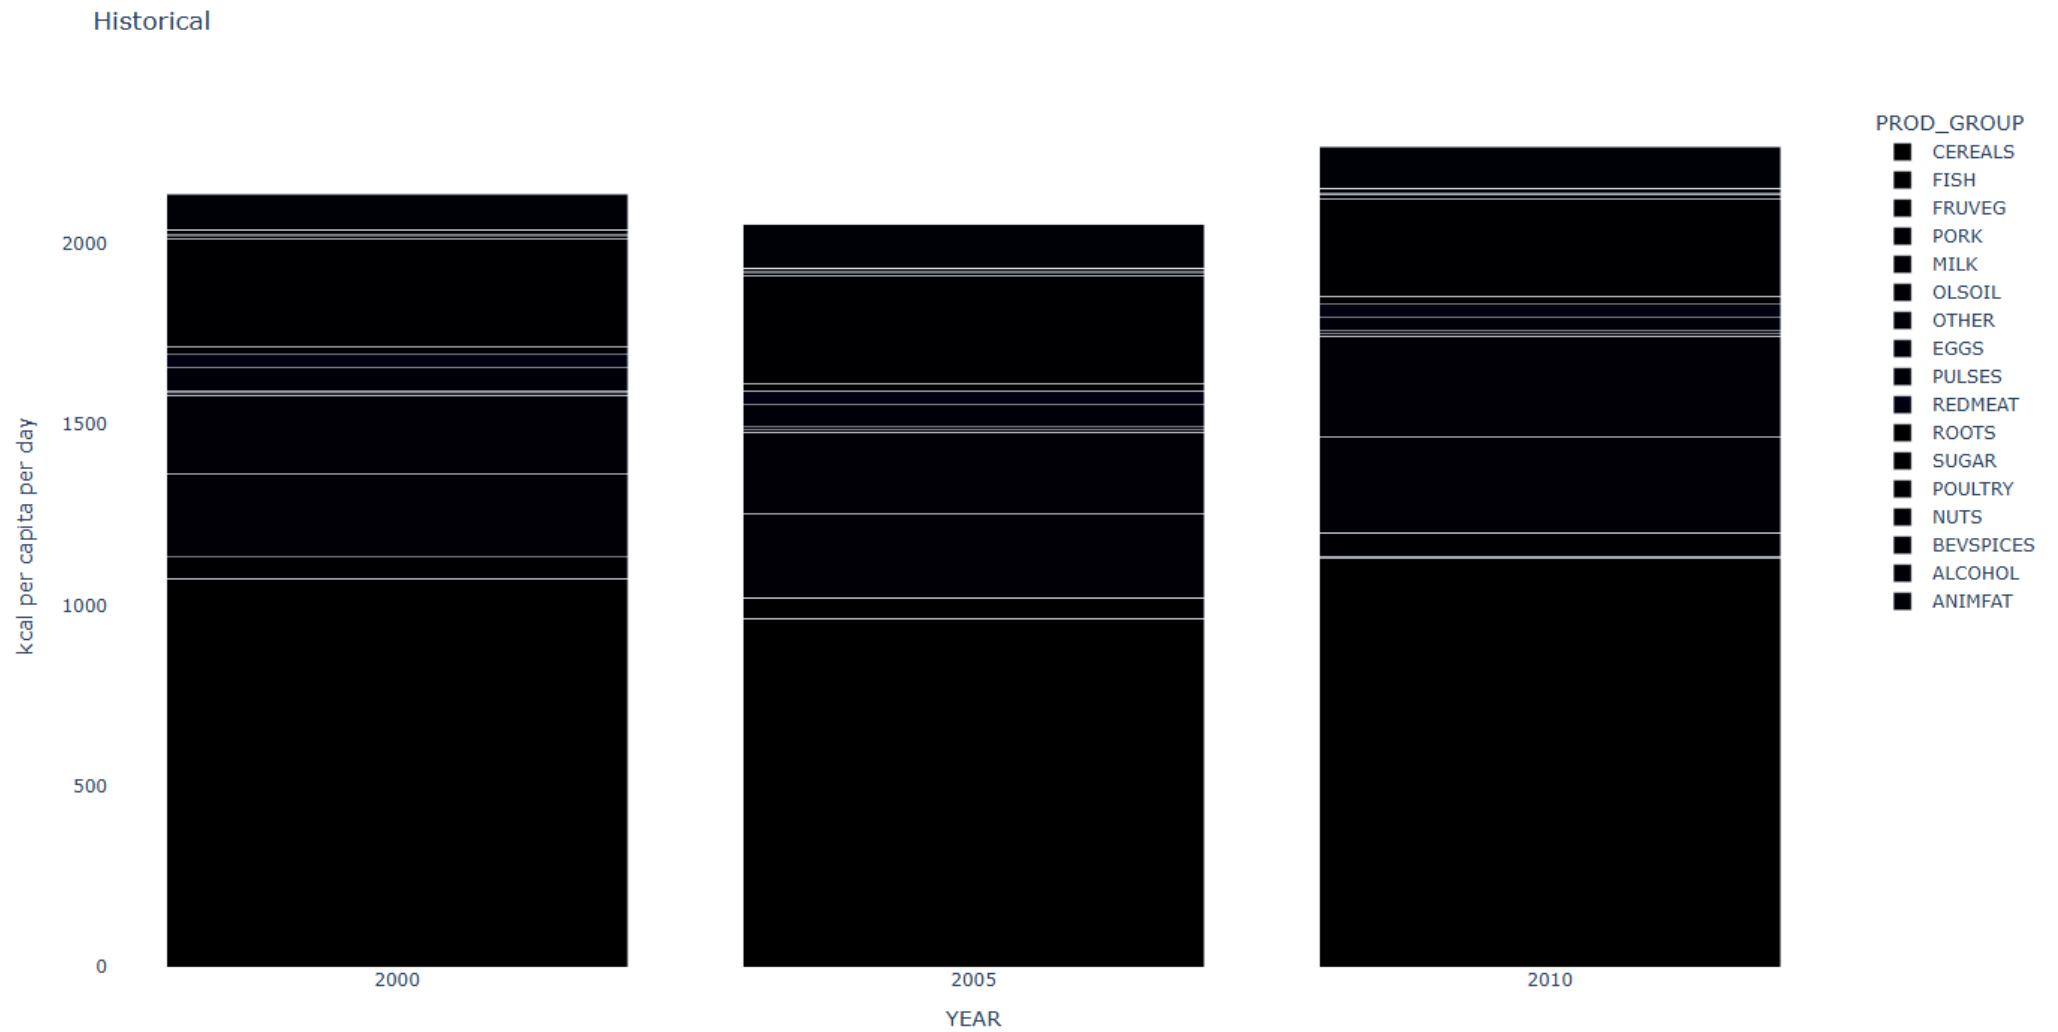

Diet mix (2050)

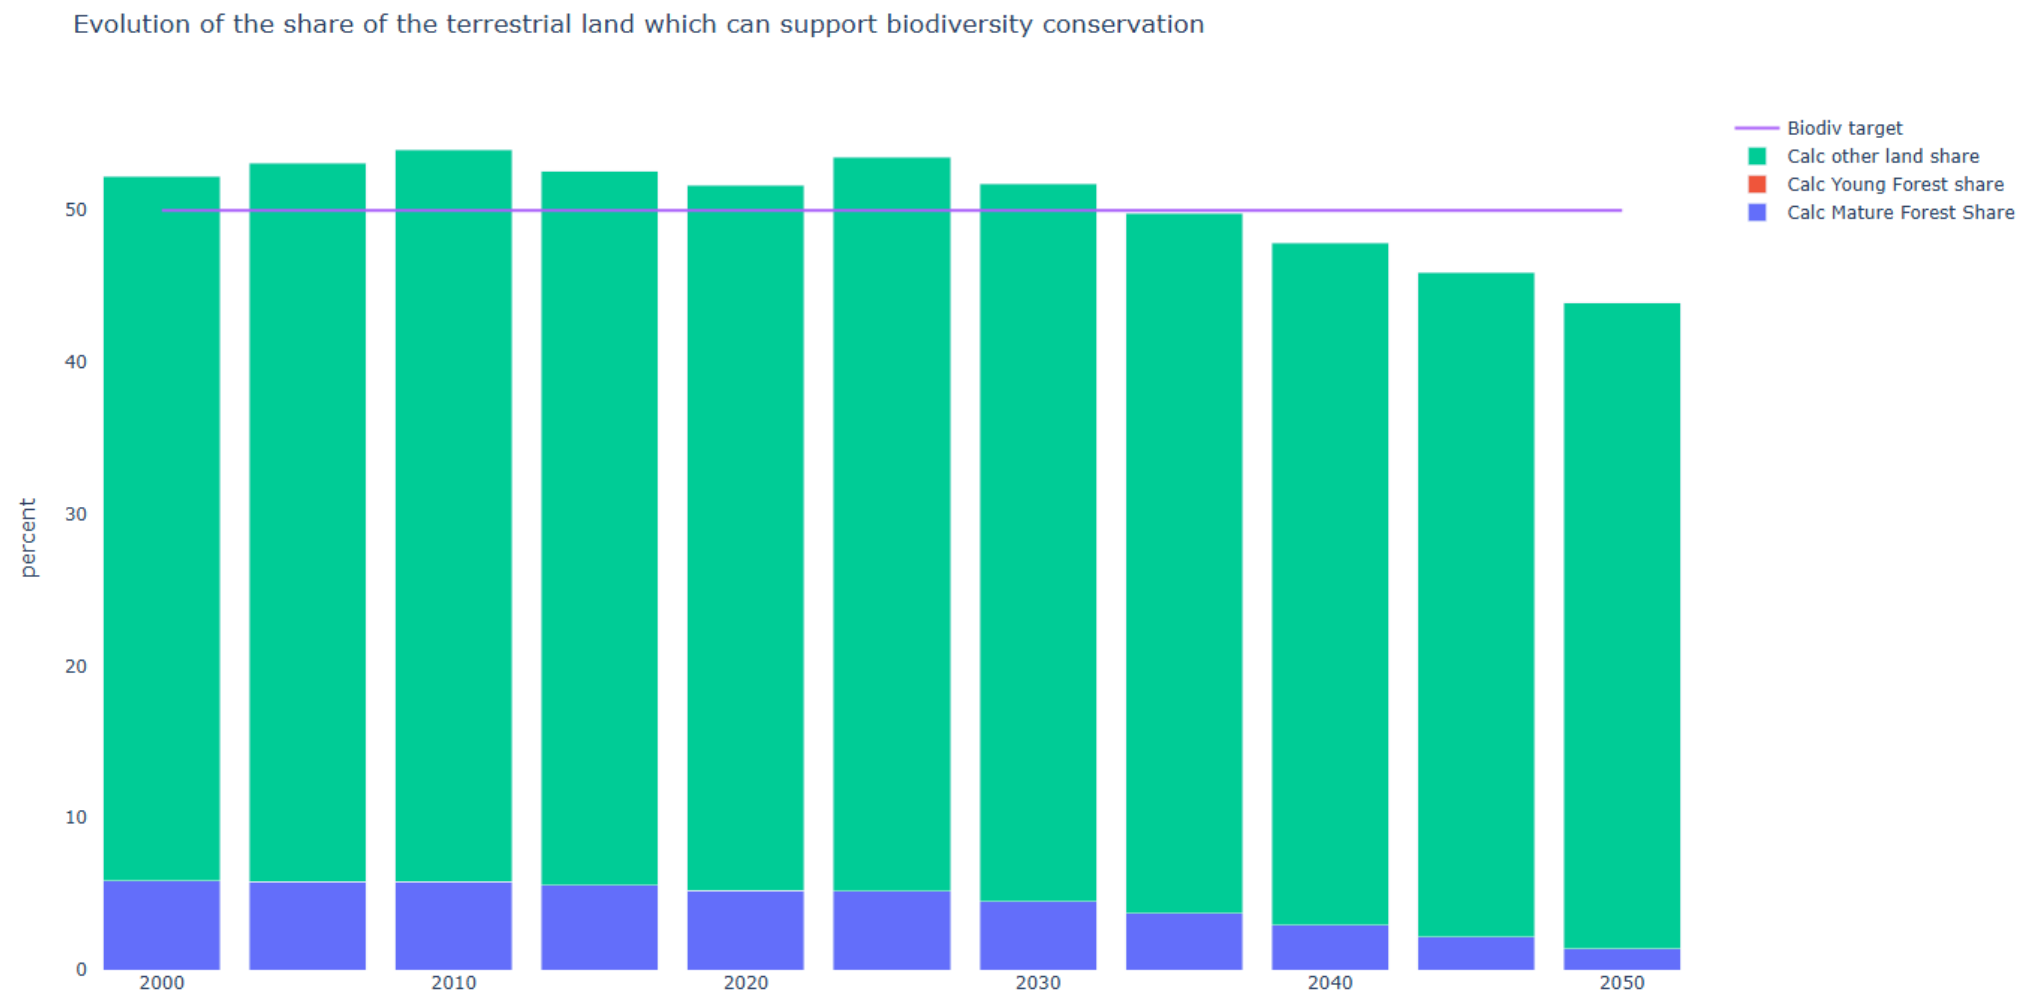

Composition of healthy food consumption

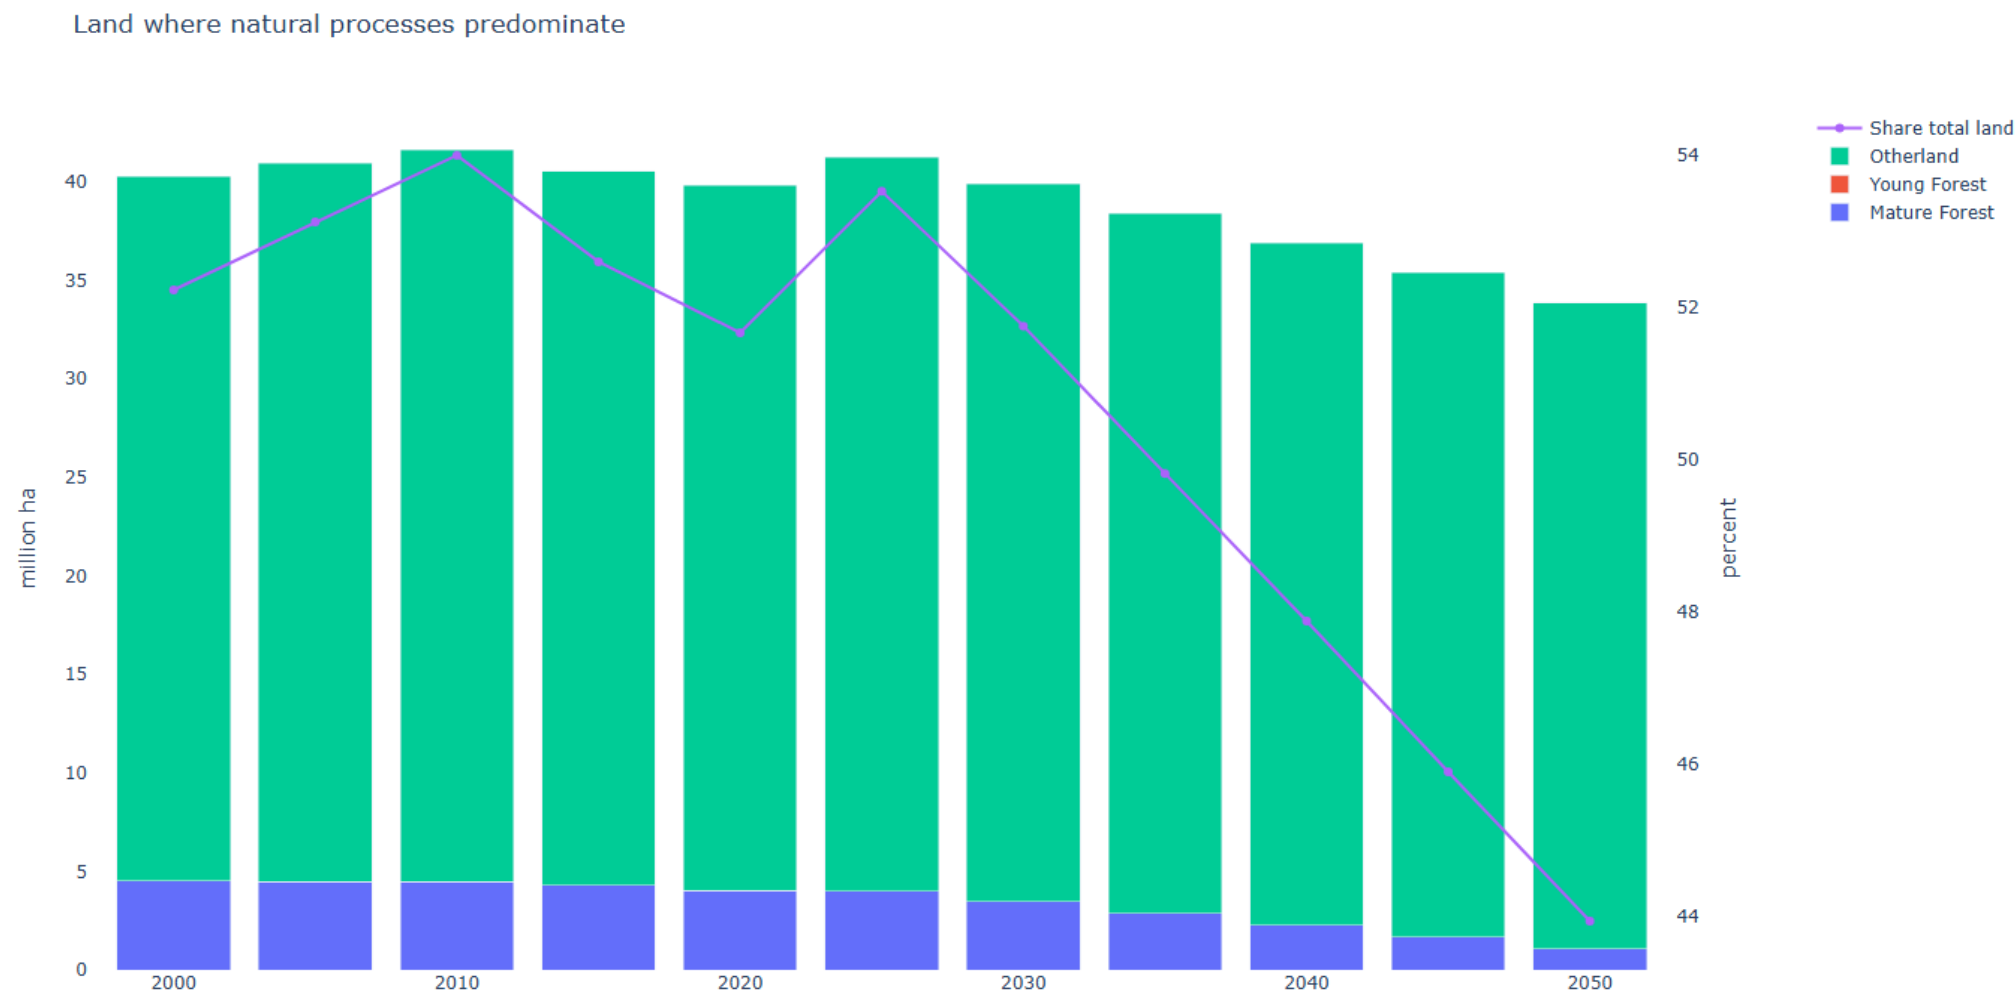

Historical
